DELIVERING GENDER EQUALITY: A BEST PRACTICES FRAMEWORK FOR MALE-DOMINATED INDUSTRIES

PRESENTED BY ENGENDERING INDUSTRIES

This framework is made possible with the generous support of the American people through the United States Agency for International Development (USAID), contract Number AID-OAA-I-I4-00059. The contents of the framework are the responsibility of the authors and do not necessarily reflect the views of USAID or the United States government.

ACKNOWLEDGEMENTS

This version of the Best Practices Framework was written by Jasmine Boehm, Elicia Blumberg, Morgan Hillenbrand, Jessica Menon, Khumo Mokhethi, Hayley Samu, and Emma Edwards (Tetra Tech). This report is an adapted version of the original first version of the report authored by Dr. Brooks Holtom (Georgetown University), Brenda Quiroz Maday (RTI International), and Clare Novak (Energy Markets Group) published in 2018, with support from Melissa Dunn and Sarah Frazer (RTI International). The authors would like to thank Corinne Hart (USAID), Denise Mortimer (USAID), Portia Persley (USAID), and Amanda Valenta (USAID) for their comments and contributions to this report, as well as contributions made by Karen Stefiszyn, Suzanne Maia, and Frances Houck, Laura Fischer-Colbrie to revisions made during previous versions.

EXECUTIVE SUMMARY

Women and girls represent half of the world's employment potential. Nonetheless, gender inequality persists globally and hinders social progress. Effectively developing this talent is a key part of ensuring organizational competitiveness in the future. Capturing the gains in diversity of thought and innovation from women's increased participation in the global workforce will be critical to solving the climate crisis. In addition, a growing body of evidence demonstrates a correlation between diversity at the executive level and a company's performance. A study by McKinsey & Company analyzed more than 1,000 companies in 12 countries and concluded that gender-diverse companies are more likely to outperform their national industry average in terms of profitability.¹

Despite the evidence demonstrating women's value in the workforce, women continue to encounter structural barriers to participate in the world economy, particularly in industries traditionally dominated by men. Globally, the labor force participation rate for women is 25 percent lower than the rate for men.² On average, women work fewer hours for pay or profit either because they opt to work part-time or because part-time work is the only option available to them. In some countries, gender gaps in hourly wage rates for similar work can reach 20 percent.³ According to the World Economic Forum (WEF), with current trends, the overall global gender gap will take 135.6 years to close.⁴

The U.S. Agency for International Development (USAID) is committed to promoting gender equality and women's empowerment and strengthening all workplaces, especially in male-dominated industries where significant equality gaps are observed, to fuel economic growth and social development. Through its Engendering Industries program, USAID identified the employee life cycle as a key entry point to

Attraction and Talent Outroach

Talent and Employee

Life Cycle

Talent and Leadership

Talent and Lea

effecting long-lasting and impactful change within partner organizations within male-dominated industries. From attraction and talent outreach to separation and retirement, there are numerous opportunities to promote gender equality within any workplace.

This framework provides workplaces, particularly those in male-dominated industries, with global best practices and practical resources to identify gaps, define objectives, and establish a road map for sustained progress in integrating gender equity throughout their operations and corporate structures. As illustrated in **Figure I**, the framework is divided into twelve categories, eight of which are phases of an employee life cycle, and four which represent organizational enablers for gender equity.

World Economic Forum (WEF). (2021). The Global Gender Gap Report 2021. Available at https://www3.weforum.org/docs/WEF_GGGR_2021.pdf.

Within each phase, multiple best practices are outlined that are derived from an extensive literature review of global resources and complemented by lessons learned from USAID's Engendering Industries program. As illustrated in Figure 2, a description is provided for each best practice, as well as potential implementation challenges; examples of successful implementation; and tools, resources, and templates that provide additional information.

FIGURE 2. ATTRACTING/HIRING BEST PRACTICES							
PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE	AVAILABLE RESOURCES AND TOOLS			
RECRUITING Attract more diverse women candidates through inclusive job ads	Revise job descriptions and job ads to make them competency-based to reduce potential bias (e.g., demand certain skills instead of years of experience, and limit the number of mandatory qualifications required to apply) Create gender-neutral job ads that do not use words more commonly associated with men or women while encouraging women and men with diverse social identities to apply Use tools like the "Gender Decoder" or the "Check my Job" to check job descriptions for unconscious gender bias, length, and recruitment best practice Post job advertisements in a variety of media, such as company career pages, job and recruiting websites, and LinkedIn, to reach more diverse	Validating competency-based job descriptions is time-consuming Local languages may present a challenge for clearly worded job postings, particularly when different words are used for masculine and feminine nouns, like "engineer." Gender-neutral and/or gender-inclusive language may be viewed as an unimportant detail by the author of the job ad	Organizations adopt gender- inclusive and neutral language and base job descriptions on validated competencies Notable increases in female candidates applying to open positions	Guide: Tips for Writing Better Job Ads (NCWIT) Guide: Checklist for Reducing Unconscious Bias in Job Descriptions/ Advertisements (NCWIT) Tool: Gender Decoder for Job Ads (Kat Matfield) Tool: Check my Job (Eploy) Case Study: KOSTT First Female Transmitter Article: Women Do Not Apply To 'Male Sounding' Job Postings (Science Daily)			
	women and men						

The target audience for this framework includes decision-makers within a workplace, such as Human Resources (HR) and operations professionals, development practitioners, gender experts, and technical advisors working in male-dominated sectors, including water and energy sectors. This framework can be used as a stand-alone guide for organizations looking to improve gender equality by identifying gaps in their current practices and taking concrete steps toward implementing sustainable change.

Due to the diversity of companies, cultures, and national and local labor laws and trade unions, the framework addresses issues related to both equity and equality. These efforts are jointly referred to as "gender equality" to ensure consistency; however, both equity and equality practices are included in this framework. Definitions for equity and equality can be found in the glossary in Annex I.

Further, gender equality is only one lens through which to improve diversity and inclusion. Although this framework emphasizes gender equality, all of the best practices may be applied with a broader diversity and inclusion lens, and users are reminded at intervals to consider the intersectionality of gender equality alongside other social identities (e.g., race, socioeconomic status, ability status, etc.).

WHY WAS THIS FRAMEWORK CREATED?

USAID commissioned the development of this framework as part of its Engendering Industries program in 2018 to provide a user-friendly resource that outlines evidence-based best practices that can be applied to increase gender equity in utilities. The framework has since been revised on an annual basis and applied to workplaces in other male-dominated industries beyond energy and water utilities.

Workplaces can use this framework to identify gender equality gaps, set gender equality goals and priorities, benchmark their progress, and establish longer-term plans for sustained progress on gender equality. This framework may also be used to apply best practices in a way that understands and respects that neither women nor men are a homogenous group, and other social identities such as race, ethnicity, age, and ability add to the diversity of workforces and must be considered.

Additionally, this framework was developed to raise awareness among workplace leaders about the importance of gender equality by providing an overview of the business case for gender equality and outlining concrete steps that can be taken to achieve it. Workplace leaders must set gender equality as a corporate goal because managers and staff need to commit the time, strategic planning, and resources to change the organizational culture to achieve gender equality. Senior leadership, HR managers, and other department managers can use this framework to design, implement, and evaluate gender equality interventions and shift the corporate culture to include shared values and beliefs that include gender equality.

ABOUT ENGENDERING INDUSTRIES

The vision of the Engendering Industries program is to contribute to increased gender equality in maledominated sectors, strengthening the industry and supporting the empowerment of women in the workplace. Its primary mission is to improve gender equality and business performance outcomes in male-dominated organizations through the implementation of gender equity and organizational change management interventions throughout the employee life cycle. Expanding women's workforce participation in male-dominated industries leads to tangible economic outcomes for women, such as formal employment opportunities and higher income. Increased gender equality in the workforce also improves business performance, increases employee retention and satisfaction, reduces turnover, drives productivity, and enhances an organization's resilience to crises and economic shocks.

Launched in 2015 by USAID, the Engendering Industries pilot program sought to better understand interventions that effectively increase the role of women in electricity utilities. The program began with a study—the first of its kind—to examine the role of women and gender disparities within electric power distribution companies. The data showed wide variation in employment practices and outcomes and suggested that women were excluded from most jobs within these companies. The findings illustrated inequalities in employment outcomes, and disparities in the way utilities run their businesses, both of which impact women's ability to fully participate in the energy sector.

To address these findings, Engendering Industries began working in the pilot phase in 2016 with seven energy utilities in five countries. All Engendering Industries' partner utilities saw an increase in the number of female employees, most saw an increase in the number of women participating in employee training programs, and some saw an increase in the number of women trainees hired, interviewed, and participating in internship programs. Following the success of the pilot phase, Engendering Industries

continued its partnership with these utilities while expanding partnerships worldwide. The program has worked with 86 organizations across 41 countries to date.

Engendering Industries uses a unique approach to improve gender equality in male-dominated sectors. Using customized tools and best practices, demand-driven coaching, the Workforce Gender Equality Accelerated Program, male-engagement workshops, and other programming, Engendering Industries, builds staff capacity to implement gender equality interventions at their organizations.

Workforce Gender Equality Intensive Program

Engendering Industries Workforce Gender Equality Intensive Program is a two-year program through which public- and private-sector partners use the Best Practices Framework coupled with changemanagement coaching and participation in Georgetown University's Gender Equity Executive Leadership Program to implement gender equality interventions at their organizations. 39 organizations across 26 countries are currently enrolled in the Engendering Industries Intensive Program, with tangible business performance results and impacts.

Workforce Gender Equality Accelerated Program

The Engendering Industries Workforce Gender Equality Accelerated Program is a six-month program that rapidly develops the skills and tools needed to increase gender equality in the workplace. The Accelerated Program consists of organizational gender equality assessments, a seven-week virtual or one-week in-person course, and four months of change management coaching that prepares managers to become positive agents of change within their organizations. Managers develop the skills needed to identify gender equality gaps within their organization, develop a business case that demonstrates how gender equality will benefit the organization's bottom-line, and take targeted, tangible, and strategic action to increase gender equality in their organization. The program is facilitated by a team of Engendering Industries' change-management and gender equality experts in conjunction with faculty and staff from academic and regional partners.

Men's Engagement

Engendering Industries delivers week-long men's engagement workshops for leaders and employees in male-dominated industries. The program raises awareness of the important role men play in changing corporate culture, fosters healthy masculinity, and inspires and motivates men to become vocal leaders for gender equality. The workshops also demonstrate how employees can garner broad support within their organizations by showing the positive outcomes for men when increasing gender equality and strategically engaging men in their efforts.

Self-Empowerment and Equity for Change Initiative

The Self-Empowerment and Equity for Change (SEE Change) Initiative, implemented in partnership with Johns Hopkins University, empowers women around the world through evidence-based personal agency trainings. Trainings support women to realize their leadership potential, foster self-reliance, and achieve their personal and professional goals. SEE Change partners with a range of organizations, from small enterprises to large corporations and social enterprises. SEE Change has program tracks for entrepreneurs, employees, and sales agents with a proven track record of advancing personal empowerment, gender equality, and business growth in multiple countries and contexts worldwide.

Women in African Power Network/Power Africa

Engendering Industries manages Power Africa's Women in African Power Network (WiAP), which supports the participation and advancement of women in Africa's energy sector. WiAP members gain access to professional growth opportunities through webinars, networking, job opportunities, and newsletters. Members' work is also featured across the network, raising the profile of women working across the power sector in Africa.

Engendering Industries Partners

USAID's Engendering Industries program partners with organizations from around the world to advance women's workforce participation in male-dominated sectors. The program is implemented by Tetra Tech in partnership with Georgetown University's McDonough School of Business, Johns Hopkins University, Promundo, the Iris Group, Fulbright University in Vietnam, Universidad de Los Andes in Colombia, Lagos Business School in Nigeria, Energy Regulators Regional Association (ERRA) in Hungary, the Kenya Electricity Generating Company (KenGen) in Kenya, and the Men Engage Alliance.

METHODOLOGY

The methodology to develop this framework (as depicted in **Figure 3** below) included the identification and adaptation of the employee life cycle, a literature review, the selection of best practices and tools, and the implementation of a selection of those best practices with Engendering Industries partners.

FIGURE 3. Methodology for the Development of the Best Practices Framework

I. THE EMPLOYEE LIFE CYCLE MODEL

The selected best practices in this guide are informed by the employee life cycle illustrated in Figure 4 (page 4), which includes two layers of entry points: I. the employee life cycle; and 2. the organizational enablers surrounding it.

The employee life cycle is the main entry point for gender equality interventions. The employee life cycle contains all eight phases an employee can experience, starting with Attraction and Talent Outreach, going to Recruiting and Hiring, Onboarding and Training, Performance Management, Compensation and Benefits, Talent and Leadership Development, Retention and Employee Engagement, Succession Planning and Promotion, and ending with Separation and Retirement—all of which inform related HR practices.

The second layer focuses on organizational enablers, which include entry points for gender equality that serve as prerequisites to support interventions within the employee life cycle. These identified organizational enablers are critical, as they may be either success factors or significant obstacles and therefore need close attention. These enablers include Company Policies and Grievance Management, Corporate Culture and Leadership Models, Company Performance and Reporting, and Corporate Communication and Branding.

FIGURE 4. Employee Life Cycle

Although the employee life cycle explicitly focuses on a specific workplace and its employees, it is also important to recognize the societal and sectoral context within which an organization operates. This context influences norms, beliefs, and practices that pervade workplace culture and therefore is critical for workplace leaders to understand when implementing best practices. This context consists of the national legal and policy framework, regional gender norms and values, the economic environment and attractiveness of the market, the quality of the education system, services, and infrastructure to enable workforce participation, as well as monitoring and regulatory organizations. Additionally, workplaces may also influence the societal and sectoral context. Therefore, although this framework focuses on the employee life cycle and organizational enablers and does not explicitly address this broader context, organizations are encouraged to understand the societal and sectoral context when implementing best practices.

2. CONDUCTED A LITERATURE REVIEW

A literature review was conducted to identify and analyze the most relevant research on gender equality in the employee life cycle and beyond. Over 300 open-source publications were reviewed throughout the original formulation and three subsequent updates to this report.

Criteria were set to narrow the scope of the literature review to evidence most directly applicable to improving gender equality across the employee life cycle and within the organizational culture in maledominated sectors. Resources selected for inclusion in the framework met the following criteria:

- Were open source.
- Included tested and proven practices from reputable sources.
- Measured impact using data collected from objective sources.
- Aligned with global best practices and principles.

3. SELECT BEST PRACTICES

To curate the best practices featured in this framework and include the most applicable recommendations for male-dominated industries, the practices

- Are aligned with the employee life cycle phases and organizational enablers.
- Consider the in-country regulatory environment and laws when analyzing regional/country variables, planning training, and providing technical assistance.
- Foster diverse cultural and gender-equitable environments with special emphasis on diverse country scenarios and experiences; and
- Align with global best practices in addressing gender equality issues in the workforce broadly.

There are many gender equality, diversity and inclusion, and intersectionality issues to consider throughout the employee life cycle. This framework aims to address the most critical and relevant gender equality issues for male-dominated sectors. Specifically, it focuses on those issues that limit women's participation, employment, and leadership within male-dominated industries in the developing world.

4. IMPLEMENTED BEST PRACTICES

Currently, the Engendering Industries has 110 partner organizations in 41 countries globally and Accelerated Program participants globally that receive training and tailored change management coaching to support them in applying the best practices in real-life working conditions and scenarios. These partners predominantly represent electricity and water utilities, as the program expands partnerships into other male-dominated industries. During each phase of expansion into a new industry, the Engendering Industries program evaluates the application of this framework.

Faculty from Georgetown University's McDonough School of Business and the Engendering Industries coach developed the curriculum for the Gender Equity Executive Leadership Program (GEELP) based on the selected best practices during the pilot phase of the program. During all partnership engagements, partner HR and operations staff learn firsthand how to apply the best practices in their companies with

support from the GEELP course, faculty, and Engendering Industries change management coaching. Additionally, the Engendering Industries program launched a week-long Accelerated Program, accompanied by virtual coaching, in five regions globally with a targeted audience from diverse maledominated industries. The curriculum for the Accelerated Course is organized around this framework and the employee life cycle and presents additional opportunities for application and testing in diverse industries.

5. MONITOR, EVALUATE, LEARN, AND ADAPT

A monitoring and evaluation (M&E) system complemented the pilot implementation of this framework to facilitate learning and adaptation. M&E activities continue to capture both qualitative and quantitative information on the effectiveness of the approaches, strategies, and activities designed and implemented by partners during their participation in the Engendering Industries program. Additionally, M&E activities gather information to build, test, and validate the framework by analyzing results data from partners and capturing lessons learned about successes (and barriers to success) partners encounter while implementing these best practices. Iterative and adaptive monitoring and evaluation activities continue with subsequent program phases and additional partnerships.

Based on analysis of partner changes in gender parity and gender equality results, best practices are continuously revised and adapted, and case studies and tools are developed to share practical experiences and results. With each revision of this publication, we will continue to update both the Intensive and Accelerated Programs to stay current and applicable to a variety of industries.

THE BUSINESS CASE FOR GENDER EQUALITY—WHY GENDER **EQUALITY MATTERS**

Increasing gender equity and opportunities for women in the economy not only establishes a foundation for increasing prosperity and economic growth around the world but also leads to increased gender equality and women's empowerment. Gender equality is a fundamental human right, and its advancement is critical to all areas of a healthy society, from reducing poverty to promoting health, education, protection, and well-being of girls and boys. 5 The World Economic Forum (WEF) showed that in recent years we have actually moved backward in our quest for gender equality. 6 The WEF attributed this reversal to a significant discrepancy in the global labor force participation rate, a gap that has been widened due to the COVID-19 pandemic.⁷

Several studies have found that by not addressing gender gaps in economic participation and employment, economic growth can be stymied. The United Nations (UN) estimates that the full participation of women in the labor force would add double-digit percentage points to most national growth rates.8 The McKinsey Global Institute (MGI) estimated the economic losses of not achieving parity by 2025:9

- In a "best in region" scenario, in which all countries match the rate of improvement of the fastestimproving country in their region, it could add as much as \$12 trillion, or 11 percent, to the annual gross domestic product (GDP) by 2025.
- In a "full potential" scenario, where women play an identical role in labor markets to that of men, as much as \$28 trillion, or 26 percent, could be added to the global annual GDP by 2025.

There is a growing body of evidence establishing a correlation between increased representation of women in corporate leadership roles and stronger business outcomes for companies. The Peterson Institute for International Economics examined the business case for gender equity by conducting a global survey with 21,980 firms from 91 countries. The results suggested that the presence of women in corporate leadership positions may improve a firm's performance. 10 In a study of Fortune 500 companies, Catalyst found that firms with higher gender diversity in management had 35 percent better return on equity (Roe) than firms with poor gender equity. II Additionally, research conducted by FP Analytics reveals that the top-quartile companies with the highest percentage of women in executive management roles are, on average, 47 percent more profitable than those in the bottom quartile. 12 The 2021 Women in the Workplace report finds that, compared to men at the same level, women managers are taking more action to support their teams, from helping employees manage their workloads to checking in regularly on their overall well-being. This helps employees feel happier, less burned out, and

less likely to leave their jobs. While men in senior leadership outnumber women two to one, employees are equally likely to say that women and men leaders have supported their career development. This means women are shouldering roughly double the load of mentorship and sponsorship. ¹³ These studies are part of a mounting body of evidence that shows gender balance in management and leadership matters.

HOW TO DEVELOP A BUSINESS CASE FOR GENDER EQUALITY

Developing a business case for gender equality is critical for achieving buy-in and strategic action from all staff, particularly senior leadership. The business case can serve as the "guiding light" so all stakeholders know how improving gender equality can contribute to better business outcomes. ¹⁴ A business case can be specific to a particular industry or to an organization. The global evidence noted above can support an organization's business case, but it is also important that the organization identifies its own strategic business priorities, examines sex-disaggregated organizational data, and determines how gender equality can help achieve the organization's strategic business goals.

WHAT IS A "BUSINESS CASE FOR GENDER EQUALITY?"

A business case provides justification for undertaking a project, program, or portfolio.

It evaluates the benefit, cost, and risk of alternative options and provides a rationale for the preferred solution.

The business case should:

- Identify a business need or challenge and explain how the organization plans to address it. Ideally, the business case should address a specific pain point, such as loss of revenue, and dovetail with the organization's strategic business objectives.
- **Describe the root causes of the business challenge** and articulate how gender equality can help solve the challenge.
- Identify what specific actions or changes are needed.
- Articulate expected outcomes, including the expected quantitative and qualitative results.
- Include SMART targets that are specific, measurable, achievable, realistic, and timely.
- Motivate organizational leadership and help drive change at the organization. The business case should reflect analysis and understanding of decision-makers' interests.
- **Identify risks and limitations**, including staffing limitations, like a hiring freeze or other resource limitations.
- **Be flexible and supported by data** and articulate the need for monitoring, evaluation, and reformulation over time.

OADMAP FOR WRITING A BUSINESS CASE

WHAT IS YOUR CASE?

Justification, opportunity, or problem statement. You are telling a "story" about how to meet a business need.

POSSIBLE SOLUTIONS

Clarify the need. (What opportunity are you pursuing? What pain are you trying to alleviate?) Give stakeholders options for addressing the need. Seek counsel from those who know what persuades decision-makers in your company.

LIST ADVANTAGES

Articulate the positive quantitative and qualitative outcomes that are expected. Fill out the Business Benefits Evaluation worksheet, which can be found in the Engendering Industries Guide, <u>Developing a Business Case for Gender Equality</u>.

BUILD SUPPORT

Assemble a cross-functional team from across the organization to ensure multiple perspectives are heard.

MINIMIZE RESISTANCE AND ANTICIPATE ROADBLOCKS

Predict the scope and potential risks. What is the main goal, and how long will it take us to accomplish it?

PLAN OUTLINE

Plan the next steps, including milestones, to-dos, deliverables, and the right medium to make your case and "make it shine." Be realistic as you develop your strategy and implementation plan.

ADDRESSING GENDER EQUITY AND WOMEN'S LEADERSHIP IN CLIMATE CHANGE RESPONSE

Over the coming decades, climate change is expected to significantly disrupt daily life, including the nature of where and how we work. Due to socio-cultural structures that deprive women of access to resources, decision-making, information, and agency, climate change is not gender-neutral and has the potential to exacerbate existing inequalities, as women and girls, as well as members of other underserved communities, are likely to experience the greatest impacts. ¹⁵ Many male-dominated sectors, such as energy, water, construction, manufacturing, and more, will be significantly impacted by climate change in the coming years as resources become scarce and supply chains are disrupted. However, studies show that gender-equal companies are more resilient in the face of crises.

Improving gender equality will be critical to prepare these sectors to withstand the negative impacts of the climate crisis. Ensuring equal access to training opportunities for green technology and the absence of discriminatory hiring practices will allow organizations to draw from a greater talent pool and facilitate their adaptation to the new green economy. Preparing for the impacts of climate change will also require companies to invest more in green jobs for women and men, ¹⁶ presenting an opportunity to build a more equitable and inclusive workforce with diverse skill sets. Integrating gender equity and women's leadership in climate mitigation and adaptation efforts at a workplace level is also essential to achieving more effective, equitable, and sustainable outcomes. Organizations with more female executives and board members have better performance across measures of environmental impact, and broad corporate social responsibility goals ¹⁷ and women's leadership are associated with increased transparency around climate impact. ¹⁸ After the Paris Agreement, research finds that firms with greater gender diversity reduced their CO₂ emissions by about 5 percent more than firms with more male managers. ¹⁹

Solving the climate crisis will require the talents and contributions of everyone. Women and girls have unique knowledge, skills, and networks that make them critical stakeholders in designing and implementing climate solutions. Increasing women's representation and leadership in sectors related to climate change mitigation and adaptation can build resilient organizations and lead to successful, long-term solutions to climate change.

ADDRESSING GENDER EQUITY AND WOMEN'S LEADERSHIP IN THE ENERGY SECTOR

Despite women comprising 48 percent of the global workforce, ²⁰ women's participation in the traditional energy sector is only 25 percent, ²¹ and 32 percent in the renewable energy sector. ²² Women face structural barriers to participation in the power sector, including underrepresentation and exclusion from employment, especially in technical, higher-paying positions and leadership roles. The lack of sex-disaggregated data and research on women's roles in sector employment exacerbate inequalities by limiting understanding of where women are currently working in the sector, where gaps exist, and which interventions are most effective for addressing these gaps.

Beginning in 2014, the Ernst and Young Women in Power and Utilities (P&U) Index analyzed the boards and leadership teams of the top 200 utilities, by revenue, in the world. The 2016 report notes that the top 20 most gender-diverse utilities significantly outperformed the bottom 20 in terms of return on equity (ROE), with a 1.07 percent difference in ROE between the two groups.²³ Given that utilities are asset-heavy, this difference in ROE is significant, as it could result in millions of dollars of lost profit. The fact that similar conclusions have been reached in two different years with two different data sets (the Ernst and Young 2015²⁴ index showed a 1.5 percent difference between the two groups) further demonstrates the connection between gender diversity in leadership and better business performance.

Ernst and Young also found that the number of women on P&U boards and leadership teams is increasing, but progress is slow. The trend in the Ernst and Young 2016 index showed a reduction in both non-executive directors and total board members. At the current rate of a 1 percent rise every three years, it would take as long as 42 years to reach a 30 percent rate of women on boards, and 72 years to reach 40 percent.

ADDRESSING GENDER EQUITY AND WOMEN'S LEADERSHIP IN THE WATER SECTOR

Women play a crucial role in managing and safeguarding water at the domestic and community level; however, empirical evidence shows that they are significantly underrepresented in the water sector. Data collected from 64 water and sanitation service providers in 28 economies around the world showed that only 18 percent of the utilities' workforce are women, which means that less than one in five water workers are women.²⁵

Women are facing barriers to joining, staying, and growing in a sector that is dominated by men. Amongst these barriers are harmful gender norms, lack of role models, harassment, and lack of a women-friendly environment.²⁶ When women are present in water utilities, their progression through the organization is slow, with few women in technical or leadership positions.²⁷ For example, a World Bank study shows that only 23 percent of engineers and managers in water utilities are women.²⁸ Further, water utilities often do not attract women due to entrenched social norms and practices.

However, evidence shows that gender equality and the empowerment of women are crucial for the water sector. A study conducted by the World Bank showed that water projects are six to seven times more effective when women are involved than when they are not.²⁹ Attracting more female candidates can bring numerous benefits to a company, including increased financial productivity, greater innovation, and improved customer satisfaction.³⁰ Moreover, a gender-diverse workforce will improve performance, particularly if the company reflects a diverse and universal customer base as the one it serves in the water sector.³¹ According to the International Water Association (IWA), "there exists a strong case for focusing attention on encouraging, recruiting, training and retaining more women water professionals. From entry-level roles to leadership positions at major water utilities, the inclusion of women in the workforce will improve the business for investors, regulators, and customers alike."³²

THE IMPORTANCE OF CHANGE MANAGEMENT

Studies show that pairing gender equality interventions with a solid change management approach yields better organizational results. Improving gender equality requires shifts in behavior and changes in deeply rooted mindsets that are often embedded in culture, religion, or environment. According to the Association of Change Management Professionals, change management is defined as "the application of knowledge, skills, abilities, methodologies, processes, tools, and techniques to transition an individual or group from a current state to a future state to achieve expected benefits and organizational objectives."

Resistance to change is common, especially among those who currently benefit from the prevailing power structure. Change requires individuals to unlearn old ways of thinking that are often deeply embedded in culture, and those who are leading change management efforts should expect some resistance. Those leading the change management process should be resilient, confident, and committed to the processes despite this resistance. Having a structured change management process can help overcome resistance and ensure that changes are fully adopted and sustained. It's also important to remember that changing social norms, patterns, and behaviors can take time, often longer than desired, but making small incremental changes can lead to a greater impact in the long-term.

Key Tips in the Change Management Process:

- Have a vision
- Set goals and targets
- Develop a strong business case for change
- Identify allies and stakeholders
- Think big, but start small just keep moving

Key Resources related to Change Management:

- **Gender Strategy Toolkit** (WGEA)
- International Training Center, Handbook on Gender, and Organizational Change (ILO)
- Change Management Toolkit (University of California Berkeley)

SOCIAL AND BEHAVIOR CHANGE COMMUNICATION (SBCC)

SBCC strategies should be embedded in the change management process as communication plays a vital role in creating "tipping points" for change. Through SBCC, organizational changemakers use participatory and interactive communication techniques to develop content, materials, messages, and activities that change the knowledge, attitudes, and behaviors of individuals, groups, and teams to advance gender equality within the organization. SBCC can be used to:

- Change hearts and minds at an individual or organizational level.
- Build coalitions of industry stakeholders in support of workforce gender equality.
- Mobilize civil society actors, activists, and advocates to generate demand for workforce gender equality; and

• Drive dialogue at the national level to explore cultural, religious, traditional, or patriarchal norms that contribute to workforce gender inequality.

Social and behavior change communication is most effective when:

- Target audiences participate in the development of content, messages, and materials (for example, through focus groups, surveys, and pretesting).
- Communications content is disseminated frequently and persistently.
- Messages are consistent, coordinated, and reinforced across materials.
- Content is delivered across multiple, overlapping, and reinforcing channels; and
- Messages are delivered by individuals known to be key influencers of a target audience.

WHY INTERSECTIONALITY, DIVERSITY, AND INCLUSION **MATTERS**

While gender equality, diversity, and inclusion interventions all seek to address social exclusion, stereotyping, and discrimination, the focus of these concepts varies slightly. While anyone can be on the receiving end of disrespectful behavior, this should never be confused with systemic inequalities.

Gender is but one of many social identities that must be considered in an organization's journey toward equality. This framework encourages users to apply a thoughtful intersectional approach that recognizes the diversity of the workforce to promote equality and inclusion. The employee life cycle can also be used to increase diversity and inclusion within an organization in the same way it is used to increase gender equality in this framework.

Gender equality and diversity go hand-in-hand, and it is almost impossible for an organization to achieve its gender equality and diversity goals without using an intersectional approach. Within traditionally male-dominated workplaces, including utilities, disparities often stem from historical and cultural biases and preferences that are given to a group or individual because of their gender, race, ethnicity, religion, sexual orientation, educational background, work experience, or other social identities.

DEFINITIONS: GENDER EQUALITY, DIVERSITY, INCLUSION

- Gender equality is the equal ability of all individuals to attain and benefit from human rights, freedoms, socially valued goods, opportunities, and resources independent of sex, gender expression, and gender identity. Gender equality is more than parity in numbers and laws on the books. Achieving gender equality means that all individuals—women and girls, men and boys, and gender-diverse individuals—can meaningfully contribute and belong to their societies. Gender equity is the process of ensuring women and men, boys and girls, and gender-diverse individuals receive consistent, systematic, fair, and just treatment and distribution of benefits and resources. To ensure fairness, measures must be taken to compensate for historical and systemic disadvantages (i.e., economic, social, and political). Equitable approaches are different from approaches in which resources are distributed equally to all persons or groups regardless of specific circumstances or needs. Gender equity is the process that needs to be followed to reach the outcome of gender equality.
- **Diversity** is any dimension that can be used to differentiate groups and people from one another, and diversity interventions empower people by respecting and appreciating what makes them different in terms of age, gender, ethnicity, religion, disability, sexual orientation, education, and national origin. Diversity is about moving beyond tolerance toward valuing an individual or group for their differences.33
- Inclusion is an organization's effort and practice of welcoming, socially accepting, valuing, and equitably treating groups or individuals from diverse backgrounds. These differences could be selfevident, such as national origin, age, race and ethnicity, religion/belief, gender, marital status, and socioeconomic status, or they could be more inherent, such as educational background, training, sector experience, organizational tenure, and even personality, such as introverts and extroverts. Inclusion often means a shift in an organization's mindset and culture that has visible effects, such

³³ Global Diversity Practice. (n.d.) What is Diversity and Inclusion? Available at https://globaldiversitypractice.com/what-is-diversity-inclusion/

as participation in meetings, how offices are physically organized, or access to particular facilities or information.³⁴

- Intersectionality All individuals have multiple social identities shaping their lived experiences, including but not limited to sex, sexual orientation, gender identity, gender expression, class, race, age, disability, nationality, etc. These identities determine one's place in society, privileges and protections from human rights violations, and the impact of complex forms of discrimination. Intersectionality acknowledges that singular oppressions exist while affirming that intersecting identities interact with overlapping systems of oppression and/or discrimination. Intersectionality serves as an analytical lens that considers and addresses how a person's overlapping identities contribute to unique experiences of oppression, privilege, and access (including access to development programming).
- Micro-inequities describe small events of unfair behavior or the many ways in which people are
 overlooked or ignored based on unchangeable characteristics. Micro-inequities are mostly
 directed at people with less power, such as women, persons of color, persons with childcare
 duties, persons with special needs, persons within a certain age group, or less economic power.³⁵
- **Stereotypes** are standardized mental pictures that are held in common for members of a group, and that represent an oversimplified opinion, prejudiced attitude, or uncritical judgment.³⁶ (Source: Merriam-Webster).
- **Unconscious bias** describes positive or negative tendencies of favoring or disliking people or groups of people. The most common biases are:
 - Affinity Bias is a tendency to favor people who are like us.
 - **Halo effect** is a tendency to think that a person is skilled out of sympathy.
 - **Perception bias** is a belief about a person or group of people based on stereotypes and assumptions.

The glass ceiling, glass cliff, and sticky floor describe some of the impeding dynamics created by diversity dimensions. Studies suggest that sticky floors, often created by harmful social norms and discrimination, account for 40 percent of the gender wage gap, while the glass ceiling when associated with the "motherhood penalty" account for 60 percent of the gender wage gap.³⁷ The McKinsey & Company and LeanIn "Women in the Workplace Report" demonstrates that cracking the glass ceiling and reaching C-suite levels in a corporation is hard for women but even harder for women of color. In 2019, women represented 18 percent of C-suite executives, but women of color represented only 4 percent. Both groups have significantly lower representation compared to white men, with 68 percent representation, and men of color, with 10 percent.³⁸ This illustrates how discrimination and inequities related to one diversity dimension become even more severe when additional dimensions are added.

³⁸ McKinsey & Company and Leanln. (2019). Women in the Workplace 2019. Available at https://wiw-report.s3.amazonaws.com/Women in the Workplace 2019.pdf

The "broken rung" is a systemic weak point in a corporate structure. Women are less likely than men to be promoted to the first step up to manager. As a result, men significantly outnumber women at the manager level, which means there are far fewer women to promote to higher levels. The broken rung helps explain why the representation of women, especially women of color, at the senior manager, director, and VP levels has improved more slowly than the pipeline overall.³⁹ In 2021, 85 women of color were promoted to manager for every 100 men promoted to manager. This is around the same rate as women overall, for whom 86 women for every 100 men were promoted to manager in 2021.

Women and women with intersecting, diverse social identities, such as race, often face being an "only" or a "double only" in a workplace setting, meaning that they may be the only woman in the room in addition to being the only person of a particular social identity in the room. These intersecting social identities and experiences of isolation can compound experiences of burnout, bias, discrimination, and pressure to perform.⁴⁰

Imagine a young, single mother with three children and a non-technical educational background in a maledominated industry. She may be able to progress and succeed despite these dimensions, but her starting position will be more challenging than the starting position of others who have similar characteristics held by those already in power. Regional context, culture,

Impeding dynamics defined:

Glass ceiling is a metaphor referring to an artificial barrier that prevents women and minorities from being promoted to managerial- and executive-level positions within an organization. (Read more on the limiting effects of the glass ceiling here)

Sticky floor is a metaphor sometimes used to convey the difficulties that disadvantaged groups experience in moving from the bottom of the organizational hierarchy. it focuses attention on the first stage of progression where discrimination can be experienced. (Oxford Reference)

Glass cliff refers to a phenomenon wherein women or members of minority groups tend to be promoted to positions of power during times of crises, when failure is more likely. (Investopedia)

Broken rung refers to the phenomenon of women in entry-level jobs being less likely to be promoted to the first level of managerial positions. This, in turn, limits the number of women available for promotion into higher levels of management and dramatically shrinks the diverse talent pool available. (McKinsey & Company)

Read more on the subtle mechanisms of exclusion in <u>Handbook on Gender and Organizational Change</u>.

tradition, religion, as well as the historic evolution of the identity of those in power, strongly influence which dimensions are seen as favorable and which create systemic disadvantages. While skin color may have disadvantages in one region, ethnic background, political affiliation, or socioeconomic factors may create disadvantages in another.

Research from the US and other OECD countries showed that companies with 20 percent or more women in leadership roles tended to significantly outperform companies with less than 20 percent women.⁴¹ Complimenting this, new research conducted by the Foreign Policy includes data from 15 countries, including Nigeria, South Africa, India, and Brazil, alongside OECD countries, found that diversity matters for the bottom-line in male-dominated industries globally.⁴²

⁴² FP Analytics. (2020). Women as Levers of Change. Available at https://womenasleversofchange.com

The diversity dimensions model below, adapted from Loden and Rosener (1990), ⁴³ organizes different identity markers into four main layers (internal, external, organizational, and cultural). It recognizes that each individual comprises all of these dimensions, which can lead to exclusion or inclusion depending on the dominant characteristics in an organization. Given the evolution of society and culture since the inception of this model, including new technologies, increased global connectedness, and increased mobility, the model reflected here has been significantly updated, including the addition of the fourth layer.

Companies' value systems and HR approaches are influenced by these changes, which have also evolved generationally. For example, Deloitte focuses its research on the transformation of diversity and inclusion through the influence of millennials, who are the largest generation in the world, with over 75 million people. Millennials will comprise 75 percent of the workforce by 2025.⁴⁴ This group tends to define diversity beyond demographic characteristics, such as cognitive diversity and the variety of experiences and perspectives that each individual brings to the table, compared to Gen X and Boomers, who typically define diversity along more traditional measures (e.g., gender, race, ethnicity). Compared to earlier generations, millennials emphasize inclusion as fundamental to the way that companies do business and are an increasingly important factor for companies, as millennials tend to change jobs more frequently than the generations before.

FIGURE 5: Diversity and Dimensions Model

⁴³ Loden and Rosener's "Workforce America! Managing Employee Diversity as a Vital Resource," published in 1990 by McGraw-Hill Professional Publishing, developed a <u>framework for analyzing dimensions of diversity</u> within individuals and institutions and is still the foundation for diversity and inclusion within workforce approaches today.

⁴⁴ DeHaas, D.L., Bachus, B. & Horn, E. (2017). Unleashing the Power of Inclusion: Attracting and Engaging the Evolving Workforce. Available at https://www2.deloitte.com/content/dam/Deloitte/us/Documents/about-deloitte/us-about-deloitte-unleashing-power-of-inclusion.pdf
Chartered Institute of Personnel and Development (CIPD). (2020). Diversity and Inclusion in the Workplace. Available at https://www.cipd.co.uk/knowledge/fundamentals/relations/diversity/factsheet

These diversity dimensions are used to describe and recognize that differences exist between individuals. Inclusion is born from recognizing and honoring these differences by designing and implementing active, intentional, and ongoing engagement with diversity to leverage it as a benefit for an organization. With an inclusion approach, people's differences are valued and used to enable everyone to thrive at work. An inclusive working environment is one in which everyone feels that they belong without having to conform, that their contribution matters, and they are able to perform to their full potential.45

Although this framework focuses explicitly on gender equality as the main entry point, the vast majority of these best practices, approaches, and resources may be used to support intersectional and inclusive approaches within the workplace more broadly. Therefore, throughout the best practices framework, language is used to remind users to apply best practices through both an intersectional and diversity and

inclusion lens. In addition to resources that are embedded throughout the framework, the resources below explicitly support increasing diversity and inclusion.

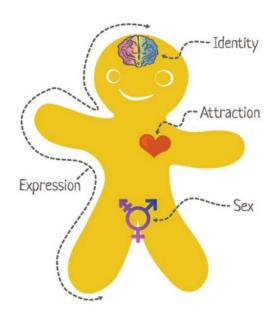

INCLUSION OF THE LGBTQI+ PERSONS

Individuals who identify as lesbian, gay, bisexual, transgender, queer, intersex, or other (LGBTQI+) face unique discrimination and stigma that can be barriers to their inclusion in the labor force and workplace. It is critical to note that sexual orientation is not a matter of choice or preference, and it cannot be altered at will.

For definitions of gender, sex, gender identity, gender expression, and sexual orientation, please see the Glossary of Gender-Related Terms.

Homophobia, biphobia, and transphobia are terms that describe a fear, dislike, or hatred of lesbian, gay, bisexual, and transgender people. Such hatred is usually deeply rooted in stereotypes and prejudices and supported by a social and political climate that is hostile toward LGBTQI+ persons. It is strongly linked to gender inequality, as individuals who identify as LGBTQI+ might not fall squarely into their prescribed gender role. It can take many forms, for example: telling offensive jokes, using banter or words that make fun of LGBTQI+ persons, bullying, hate speech and hate crimes, discrimination, such as the exclusion of young LGBTQI+ persons from education or the job market, and other types of violence, such as forcing people to undergo therapy altering their sexual orientation—procedures which are now banned in many countries. In some countries, sexual orientation other than heterosexual is illegal and punished, even with the death penalty.⁴⁶

FIGURE 6: Genderbread Person⁴⁷

Promoting gender equality should include the inclusion of persons with diverse gender identities, expressions, and sexual orientations. Employers who enact best practices that support inclusivity see a positive impact in almost all aspects of business, from employee recruitment and retention to revenue and profits.⁴⁸ Indeed, women who identify as LGBTQI+ are more than twice as likely as straight, cisgender women to feel as though they cannot talk about themselves or their life outside work. The same survey found that women who identify as LGBTQI+ who are open about their sexual orientation at work are happier, view their workplaces more favorably, and intend on staying at their current employer longer than those who are not open about their sexual orientation or gender identity.49

⁴⁷ Figure 6: Genderbread Person, available from: https://www.genderbread.org/

⁴⁸ SHRM. (2022). Ensuring Workplace Inclusion for LGBTQ Employees. Available at https://www.shrm.org/resourcesandtools/tools-and-samples/toolkits/pages/lgbtq_inclusion.aspx

⁴⁹ McKinsey & Company and LeanIn. (2019). Women in the Workplace 2019. Available at https://wiw-report.s3.amazonaws.com/Women in the Workplace 2019.pdf

One's identity can change over time, or an individual might not fit into specific identities. For example, an individual might be nonbinary, meaning they do not identify as either a man or a woman. Overall, people may choose to express themselves differently through their gender identity, sexual orientation, or other characteristics, making it even more critical that we challenge social norms and create space and acceptance for diverse gender and sexual characteristics. An employer will not know whether or not an individual identifies as LGTBQI+ unless that individual chooses to disclose their identity. Therefore, a strong policy environment that prevents discrimination can help organizations ensure that all employees feel comfortable and happy at work. Companies should also consider other best practices, such as creating an inclusive corporate culture, providing training on LGBTQI+ identities, establishing employee resource groups for employees who identify as LGBTQI+, and adopting inclusive communications and internal messaging.

WHY MALE ALLYSHIP MATTERS

Engaging both men and women for gender equality within organizations is a necessity for organizations to address inequalities more effectively in employment outcomes and disparities in the way they run their businesses. Sustainable change requires men to become partners and allies in supporting gender equality and ending discrimination and harassment. Men like women, regardless of whether they are in leadership positions, can engage in formal and informal ways to consciously elevate women colleagues in the workplace. Gender equality is about women and men.

Globally, most men support gender equality, and the majority of men acknowledge that gender equality can only be achieved with male support. 50 Male allies for gender equality who speak up about sexism are more likely to be taken seriously and evaluated more positively than women who do the same.⁵¹ Women who speak up about sexism are rated as less competent compared to a man that does the same. In addition, men who confront bias or sexism are more likely to be persuasive due to their lack of apparent personal stake in gender equity.⁵² Research shows that women who believe they have strong allies at work feel a greater sense of inclusion and more energy and enthusiasm on the job.53

Who is an ally?

An ally is someone who is not a member of an underrepresented group but who holds a position of privilege and power and can advocate and take action to support that less represented group, without taking over their voice. An ally aligns with the underrepresented group, working alongside them, to seek justice. Allyship is important in making sure that everyone is not only invited to the table but is also heard, acknowledged, and recognized for their contributions.

A male ally is any person who identifies as a man that advocates for and speaks up in support of gender equality and other forms of discrimination and bias.

In addition to these benefits of male allyship, gender equality efforts in the workplace benefit both men and women. Workplace interventions that foster gender equality, such as offering family leave or paternity leave, can have immediate and direct benefits for men. Overall, the WHO finds that men's health is poorer in more gender-unequal societies, while men say they are more satisfied with life⁵⁴ and are less likely to be depressed and commit suicide in more gender-equal societies.⁵⁵ It is critical and beneficial for men to be allies for gender equality in the workplace. However, according to research conducted by Equimundo in 2019, 77 percent of men report that they are doing "everything they can" to support gender equality at work, while only 41 percent of women agree.⁵⁶ Many of the best practices outlined in this framework can help organizations foster a culture of male allyship and can help individuals take steps toward becoming or strengthening their contributions as male allies.

USING THIS FRAMEWORK TO ADDRESS GENDER EQUALITY, DIVERSITY, AND INCLUSION IN TIMES OF CRISIS

This version of the framework was released in January 2023, following a remarkable and impactful three years for nations, organizations, and individuals universally impacted by the COVID-19 pandemic. The global pandemic caused by COVID-19 created major disruptions in the social and economic sphere. It was a unique experience as this crisis "hit" almost all nations at the same time, and there was no escaping impact.

The situation required immediate disaster response planning, swift solutions, and an immediate need to adapt organizational processes so that workforces could continue operating and delivering essential services to communities globally. Although the impacts have been staggering for individuals, governments, and companies, they also created opportunities for companies to become more resilient, prepare for a "new normal," and strengthen disaster response planning.

This framework provides workplace leaders and change agents with tools and resources to increase gender equality, diversity, and inclusion within their organizations. COVID-19 has forced leaders and change agents to reflect on their ability to manage competing priorities in times of crisis. How can an organization's gender equality, diversity, inclusion, and other mission-driven efforts be kept alive when the economic survival of the company is at risk? There is a risk that equality and inclusion efforts may recede as a strategic priority for organizations in times of crisis. Paradoxically, achieving equality and inclusion may be strategic in building an organization's resilience during times of crisis.⁵⁷

This chapter outlines risks to gender equality, diversity, and inclusion during times of crises, opportunities that arise to realign these as strategic priorities, and the benefits of including these priorities as integral parts of disaster planning.

RISKS TO GENDER EQUALITY, DIVERSITY, AND INCLUSION DURING CRISIS

An organization must reflect on how to continue prioritizing gender equality, diversity, and inclusion during times of crisis and to ensure that ad hoc crisis response measures will not negatively or disproportionately impact women or men.

I. DIRECT NEGATIVE IMPACTS OF DISASTER RESPONSE ON WOMEN OR MEN, INCLUDING LAYOFFS

Due to massive demand decreases during COVID-19, as industrial customers were shuttered and non-essential businesses were closed, many essential service providers, such as electricity and water utilities, began preparing for worst-case scenarios. Many utilities responded by reducing working hours for their staff, implementing hiring freezes, and reducing training initiatives. Others began preparing for layoffs should the situation require more drastic measures. By the end of 2020, the number of employed women around the world fell by 54 million, a number of people comparable to the entire population of Kenya.⁵⁸

⁵⁷ Dolan, K. et al. (2020). Diversity Still Matters. Available at https://www.mckinsey.com/featured-insights/diversity-and-inclusion/diversity-still-matters

⁵⁸ UN Women/UNSD. (2021). Progress on the Sustainable Development Goals: The Gender Snapshot. Available at: https://www.unwomen.org/sites/default/files/Headquarters/Attachments/Sections/Library/Publications/2021/Progress-on-the-Sustainable-Development-Goals-The-gender-snapshot-2021-en.pdf

In response to an April 2020 survey of utilities by PWC, power and utility companies cited the following as their top three concerns with respect to COVID-19:59

- Budgetary impact, including effects on results of operations, future periods, liquidity, and capital resources (71 percent).
- Fear of a global recession following the event (64 percent).
- Effects on workforce and reduction in productivity (41 percent).

Many of the COVID-19pandemics' impacts disproportionately impacted women. Women are more likely than men to work in low-paying, insecure, and informal jobs, which were disproportionally affected by the pandemic. Women also take a larger share of unpaid work and are more likely the victims of domestic violence amidst increased economic and social tensions. When companies downsize, female-dominated roles—including office jobs and general function roles--are most vulnerable, and diversity is often no longer a priority. According to the World Economic Forum, the pandemic set the representation of women leaders back by 68 percent. In the electricity, gas, water, and waste sectors, McKinsey predicted that the most layoffs due to COVID-19 would be felt among sales workers, who are very often women. There is growing concern that gender inequalities around the world will increase, rolling back progress on gender equality and the Sustainable Development Goals. McKinsey & Company and LeanIn predicted in 2020 that the COVID-19 pandemic would "erase all the gains we've made over the past years." Two years into the pandemic, many of these impacts have been felt across the globe. The World Economic Forum estimates that it will now take 135.6 years to achieve gender equality, up 100 years from pre-COVID estimates.

2. UNEQUAL WOMEN'S REPRESENTATION IN DISASTER RESPONSE PLANNING

Women are often overlooked as stakeholders and decision-makers in disaster response planning. According to a study by CARE undertaken in 30 countries globally in June 2020: ⁶⁸

- Women only comprised 24 percent of national-level disaster response committee members.
- Twenty-five percent of countries had no gender-specific response plans.

- Fifty-four percent of countries did not counteract gender-based violence, even though it was known that during times of lock-down, gender-based violence increased significantly; and
- There was a direct correlation between the absence of women in response planning and a failure to consider gendered implications.

3. NEGATIVE GENDER INEQUALITY IMPACTS RESULTING FROM WELL-INTENDED MEASURES

Amid the fear and uncertainty of COVID-19, companies followed through with purpose statements, eliminated bureaucracy, and empowered previously untested leaders with big responsibilities. Companies "turbocharged" decision-making to adopt new forms of working that would help employees reconcile work life and family life.⁶⁹ In response to the pandemic, many businesses were adopting workfrom-home and telecommuting options on a wide scale for the first time as a response to social distancing requirements and in an effort to keep employees and customers safe.

While new policies—like flexible work options—are welcome developments in times of crisis, they can create unintended and negative impacts when they are not rolled-out thoughtfully. Implementing flexible work options for employees requires changes in leadership, management style, and corporate culture, which often takes time (see the <u>Benefits</u> best practices on flexible working). Managers must change the way they assign tasks, assess performance, and learn to trust that employees are working when they are at home.

The Engendering Industries program anecdotally observed that, during the start of the COVID-19 pandemic, some electricity utilities granted work-from-home flexibility to more women than men, partly because more men operate field jobs and partly because utilities wanted to be more protective toward women than men. The unintentional, unanticipated, and adverse effect was that some individuals who were working from home became invisible. Managers did not assign important tasks to them, were uncertain about their performance, and some utilities report that staff "disappeared" for three or four months. This can, over the long-term, create negative implications for career progression and also put those who are invisible at higher risk for layoffs (e.g., when companies start downsizing based on performance evaluations during this period).

During this unprecedented time, schools and daycare centers closed, and grandparents were discouraged from providing childcare due to the risk of exposure to the virus. With limited childcare options, working from home has required parents to juggle work while being responsive to family demands and educating their children. Both women and men have been challenged to take on more home-care duties and support their children with virtual learning and homework.⁷⁰

4. DEPRIORITIZATION OF GENDER EQUALITY, DIVERSITY, AND INCLUSION INITIATIVES

Gender equality, diversity, and inclusion efforts are often put on hold as companies prioritize what is viewed as their most pressing basic needs. These needs may include putting in place urgent measures to adapt to new ways of working, consolidating workforce capacity, and maintaining productivity. ⁷¹ Although this shift in priority seems justified at the moment, the long-term impacts may stall or roll-back

⁷¹ Dolan, K. et al. (2020). Diversity Still Matters. Available at https://www.mckinsey.com/featured-insights/diversity-and-inclusion/diversity-still-matters

gains made toward organizational gender equality gains, diversity, and inclusion. This may undermine the company's resilience to future crises and disasters because companies with greater gender equality and diversity fare better during times of crisis. Companies with gender-diverse boards are known to outperform those with no women during times of crisis or volatility.⁷² A study also found that female leaders outscored men on most leadership competencies during COVID-19, such as taking the initiative, learning agility, inspiring and motivating others, and more.⁷³

5. INCREASED RATE OF GENDER-BASED VIOLENCE (GBV)

COVID-19 created a "shadow pandemic" with increased rates of GBV, including domestic violence, which has disproportionately impacted women and children. Since the start of the global pandemic, 45 percent of women have reported that they or a woman they know have experienced a form of GBV.⁷⁴ Factors for this increase were uncertainty-related stress, loss of jobs and income, economic stress, social isolation, lack of access to support mechanisms, lock-down measures resulting in exposure to abusers without escape options, and reduced mobility.⁷⁵

Crises tend to increase GBV rates both in the home and in the community at large. One in four women reported that household conflicts became more frequent during the pandemic and seven in 10 reported that verbal or physical abuse by a partner became more common. Lockdowns also led to higher rates of GBV, whether from spending more time at home with an abusive partner or leaving public spaces less crowded and easier for perpetrators to commit acts of GBV. Four in 10 women felt more unsafe in public places, and six in 10 women thought that sexual harassment in public had worsened as a result of the pandemic. These trends are similar to other types of crises, such as natural disasters, conflict, or other events that cause displacement. One in five women in a refugee or complex humanitarian setting experience sexual violence.

OPPORTUNITIES TO STRENGTHEN GENDER EQUALITY, DIVERSITY, AND INCLUSION DURING TIMES OF CRISIS: THE SILVER LININGS

Despite the challenges, these unprecedented times have offered new opportunities to support gender equality and resilience in families and businesses. Strengthening gender equality will not only protect a company against future crises, but also ensures a company can retain critical female talent and build back better. Research shows that companies with strong female representation in leadership are 50 percent more likely to outperform others without female leadership.⁷⁹ While COVID-19 has caused many

women to reduce their hours or drop out of the workforce entirely, companies can help reverse these trends to ensure future resilience, retention of talent, and improved business outcomes. If companies rise to the occasion with bold action, they can protect hard-won gains in gender equality and diversity and lay the foundation for a better workplace long after COVID-19 is behind us.⁸⁰

I. COMPANIES WITH A STRONG BUSINESS CASE FOR GENDER EQUALITY HAVE CONTINUED AND RAMPED UP THEIR GENDER EQUALITY EFFORTS

One of the fundamental principles of the Engendering Industries program is the development of a company-specific business case that articulates how gender equality will improve company performance. (See also the employee life cycle phase Corporate Culture and Leadership). During the COVID-19 pandemic, Engendering Industries observed that partner organizations with a business case for gender equality continued to implement strategic gender equality approaches and interventions. In fact, these organizations increased their gender equality efforts during COVID-19, creating related strategies and policies and preparing interventions to begin after the lockdown. Because of what they've learned during their participation in Engendering Industries, these organizations are confident that this focus will help them to be more resilient in the future to better-tackle unforeseen crises and challenges.

Gender equality, diversity, and inclusion are critical for business recovery, resilience, and reimagination.⁸¹ The reality is that companies who continue to pursue their gender equality, diversity, and inclusion efforts are more resilient during a recession. A 2019 study that reviewed publicly-traded companies before, during, and after the 2009 Great Recession found that the financials of companies that maintained a diverse and inclusive environment flourished while those that didn't saw precipitous declines.⁸²

Therefore, it is in the business interest of companies to maintain gender equality, diversity, and inclusion as a priority for increasing resilience to prepare for the challenges of the future. It is critical to consider the bigger picture and to keep the long-term vision in mind. More diversity and inclusion will help any organization to be prepared for changes that the COVID-19 pandemic and future crises may create. Firms that choose to capitalize on these underlying changes will succeed, and the ones that do not will be disrupted.⁸³

2. NEW WORK-LIFE BALANCE REQUIREMENTS SHIFTING THE GENDER EQUALITY PARADIGM

This crisis has also catalyzed a tangible shift in gender norms, which has forced fathers—including managers and CEOs—to better understand the childcare needs of their own families. The crisis has resulted in some fathers becoming the primary childcare provider of the family, a shift that has the potential to alter gender norms in the long term. Some men are experiencing the challenges and demands of balancing work and family responsibilities for kids for the first time. The fact that more men are now engaged in fulfilling domestic duties for an extended period of time has the potential to create a sea change in gender norms—at home and at work. Men who are working remotely during the pandemic are more likely to appreciate women's work-family responsibilities, understand the value of

flexible work arrangements, appreciate the benefits of relationships with work colleagues, and model more equitable work-family gender roles for their children.⁸⁵

If the new work-from-home arrangements persist, they will disproportionately benefit working women who struggle to combine their careers with childcare needs. Indeed, Goldin (2010) identifies the lack of flexible work arrangements, especially in business and financial services jobs, as one of the biggest remaining sources of the gender pay gap.⁸⁶

Women with equal partners at home are more successful at work⁸⁷ and can focus more on their job duties and take advantage of career opportunities. Fathers who participate equally in domestic duties are able to model gender equality for their children, which helps them develop career aspirations that are not as bound by gender stereotypes, as well as shapes their future expectations for equality at home and work. Also, taking over these responsibilities makes them better allies, and in some cases, they become champions for gender equality in the workplace who will advocate for equality. Additionally, when men opt for flexible work arrangements, they add to the normalcy of using a range of options to achieve a better work-life balance.⁸⁸

ACTIONS COMPANIES CAN TAKE TO IMPROVE RESILIENCE BY PRIORITIZING GENDER EQUALITY, DIVERSITY, AND INCLUSION

WHAT CAN BUSINESSES DO TO CONTINUE PRIORITIZING GENDER EQUALITY, DIVERSITY, AND INCLUSION DURING TIMES OF CRISIS AND AVOID DISPROPORTIONATE IMPACTS ON WOMEN AND OTHER MINORITY GROUPS?

Create inclusive gender response plans and measures89

- Apply a gender and diversity lens to all decision-making to ensure any budget, planning, cuts, or other support considers the short-term and long-term differential impact on individuals and the organization. Consider alternative solutions, especially when it comes to layoffs.
- Ensure new planned policies do not create adverse effects for women or others with diverse social identities, such as work-from-home options that decrease visibility and opportunities for challenging assignments or safety measures limiting women's ability to perform.

⁸⁸ Ibid

- Draft a formal crisis response or plan to communicate both internally and externally that supporting and including women at this time is a priority.
- Ensure women and others with diverse social identities are equally represented in crisis task forces and response teams, and all decisions related to the workplace, as both participants and leaders.
- Survey employees needs to learn what their greatest stressors are as a result of the crisis and ensure women and other minority groups are equally included with data disaggregated by sex and other characteristics.
- Consult women and other minority groups, both as employees and customers, when making decisions and drafting plans to respond to a crisis to ensure that their greatest challenges are understood and that their inputs are meaningfully included in the organization's response.
- Consider how female and minority customers or other end users are disproportionately affected by the crisis and ensure that responses are equitable so that current inequalities are not exacerbated.
- Support female and minority customers by implementing temporary measures such as suspending payments, implementing safe delivery options, distributing home health kits, etc.

Ensure measures will not create adverse effects

- Support working parents, and keep in mind that the majority of unpaid care work falls on women. Men can be motivated to support women to reconcile work life and family life.
- Allow flexible work schedules and home-based work while recognizing the need for childcare and provision of support mechanisms (e.g., hotlines or childcare support) for those who struggle due to insufficient working conditions or social challenges.
- Develop a plan to account for the impacts of working from home during performance reviews—in most cases, performance criteria set before COVID-19 may no longer be appropriate—especially for women who had childcare responsibilities at home. Ensure they will not get punished for being "absent."
- Support the mental well-being of employees in times of crisis. Share domestic violence resources with all employees or find ways for women to report cases of domestic violence. Offer mental or psychological support through psychologists or other forms of coaching and/or regular check-ins with the entire team.

Ensure gender equality, diversity, and inclusion are still a priority

- Ensure gender equality, diversity, and inclusion initiatives continue during times of crisis. This could include continuing to make progress toward strategy and policy development, and developing interventions and activities, even if these need to be implemented at a later date.
- Recognize employees (with an equal number of women) on public channels/company-wide to boost morale and emphasize the importance of the roles women and others play at the company.

- Publicly commit to taking a gender-equitable and inclusive approach to the response and recovery strategy by addressing the socioeconomic impact on women and girls. Ensure female-dominated supply chains are supported, paid, and find additional ways to continue the business relationship.
- As a corporate social responsibility (CSR) measure, suspend service payments for vulnerable customers, especially female-headed households (e.g., electricity or water utility bills).

HOW TO USE THIS FRAMEWORK

The framework is divided into twelve sections, one for each of the eight employee life cycle phases and the four organizational enablers. Each section includes a description of the employee life cycle phase in general terms and is followed by a table of evidence-based best practices that can be implemented to improve gender equality. Each best practice is accompanied by the following:

- A description of the gender equality issues that are addressed by the best practice.
- Common implementation barriers.
- Definitions of success; and
- Links to resources and tools to help implement each best practice, denoting the resource type:
 - Article: a short piece of writing about a certain topic from a print or online newspaper, magazine, journal, or other publication.
 - Award/Certificate: organization or website where the reader can receive information and/or apply for an award/certificate.
 - Case Study: a record of an experience or instance that provides detailed analysis to illustrate the application of a practice, principle, or theory.
 - Example: company, website, initiative, campaign, index, policy, or document that acts as an example for a best practice.
 - Guide/Framework: a document that provides structure and/or guidance to lead users on how to approach thought and action on a particular topic.
 - Podcast: digital audio/video file or recording, usually part of a themed series, which can be downloaded from a website to a media player or computer and provides information about a special topic.
 - Report/Study: an in-depth document that provides observations and/or

- investigations, accompanied by a summary of key findings and recommendations about a particular topic.
- Tool: hands-on/practical document that can be directly used to implement a best practice (e.g., readily available templates, interview or survey questions, checklists for processes, step-by-step instructions, etc.).
- Course/ E-learning/ Webinar: inperson or online course or content that
 includes explicit learning objectives,
 achieved via training and teaching the
 user at a guided or self-paced level on a
 certain topic, and sometimes
 accompanied by a certificate at the
 successful conclusion.
- Training Resource/Tool:
 resources/materials (e.g., presentations/
 recorded webinars, templates, videos,
 etc.) that can be used by the reader to
 conduct training.
- Video: a resource that visually provides information about a topic (e.g., a video explaining a topic, video of a speech/presentation, video of a panel discussion).

Resources provided in the tables are links to live websites. As organizations update their websites, original resources and URLs may not be available or may change over time. As many resources and organizations evolve over time, these websites will also provide additional information and resources that you may find helpful.

There will be challenges that arise for organizations implementing these best practices. Strategies to overcome these challenges should be developed early on to avoid common pitfalls.

Common challenges include:

- Lack of senior leadership buy-in
- Lack of committed resources
- Limited understanding of change management processes within the organization
- Perceptions that utilities are places for only men to work
- Existence of systemic unconscious bias
- Suppression of acknowledgement and/or reporting of gender-based violence (GBV) issues
- Lack of female students studying relevant technical areas in schools
- Lack of workplace indicators disaggregated by sex and utilization of disaggregated data in decision making
- Failure to articulate the benefits of gender equity to workers and to engage unions

It is important to note that not all of these best practices may be applicable in all countries and regional contexts. Factors such as national and local labor laws and a company's internal policies should be taken into consideration when implementing this framework. Organizations using this framework should select the most appropriate best practices to address their organizational needs and use the tools associated with each best practice to guide their implementation.

In addition, as noted in the previous chapter regarding intersectionality, diversity, and inclusion, the vast majority of best practices can be applied to improve an organization's work on gender equality or another specific social identity dimension through a diversity and inclusion lens.

As a practical first step, organizations are encouraged to conduct a gender gap analysis, as defined in the glossary (Annex I), to best understand where the most egregious gender gaps exist and to focus on implementing interventions that address the highest priority areas. Conducting additional analysis, such as a salary equity gap analysis, will also strengthen the organization's ability to select and adapt the most relevant and impactful interventions for their company's specific context. It is also highly recommended that organizations work with change management, HR, and/or gender specialists to assist in the selection, design, implementation, and M&E of the best practices.

Throughout this framework, there are links to stories from energy utilities that illustrate the application of best practices with support from Engendering Industries. These stories provide the reader of this framework with information about the challenges, the solutions, as well as the impacts and results of implementing a gender equity and organizational change management intervention throughout the employee life cycle.

BEST PRACTICES FRAMEWORK

The following tables present the best practices across the eight phases of the employee life cycle, followed by best practices within four organizational enablers.

BEST PRACTICES: EMPLOYEE LIFE CYCLE

ATTRACTION AND TALENT OUTREACH

Strategic and long-term approaches to broaden the talent pool by attracting and acquiring talent for future recruiting.

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
ATTRACTION Prepare the company to be seen as inclusive for women with diverse social identities	Make sure the workplace is attractive for women and those with diverse social identities before starting to develop outreach	Companies in historically male-dominated sectors have a reputation for being poor employers to women. They need to put extra effort into showing their inclusiveness for women.	Policies in place to promote the company as a good place for women and others with diverse social identities to work
	programs, specific recruitment activities, or other activities to attract talent:		Staff composition, external appearance, a internal practices show that women and
	 Clearly state diversity gender equality goals in corporate policy, vision, and mission statements and include them in 	Companies may need to undergo structural changes first to be seen as inclusive. This can take time.	men with diverse identities can be equally successful within the company's environment
	external communication and outreach campaigns • Specifically, include employee development options, provisions for a safe and family-friendly workplace, and		Company perceived by women as a good place to work, to be measured internally (e.g., by employee surveys, retention rate of women and people with childcare duties)
	benefits 90 for employees with childcare duties in communication to different target groups • Create women-friendly policies and improve corporate culture to become a more inclusive and attractive place for women		Company perceived by the general public as an employer of choice for women and men with diverse social identities (e.g., through positive word of mouth, mentions in social media, employer evaluation platforms, or other external recognition)

⁹⁰ **BENEFITS.** Employee benefits are part of the total compensation package that includes all tangible return for an employee's labor except for direct payment. Some benefits are mandatory, such as social security benefits, unemployment compensation, and workers' compensation, while other benefits are discretionary, such as paid time off, health care, retirement, childcare, employee discounts, club memberships, and financial assistance plans. (Source: Resourcing edge, Human Resource Glossary)

TABLE I. ATTRACTION AND TALENT OUTREACH

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

AVAILABLE RESOURCES AND TOOLS

Guide: Four for Women: A Framework for Evaluating Companies' Impact on the Women They Employ (Wharton School of Business)

Report/Study: Accelerating Progress in Gender Equity from the Inside Out (EY)

Article: Creating a "Human-Friendly" Workplace (Allen Communications Learning Services)

ATTRACTION

Showcase company as a good place for women with diverse social identities to work

Showcase female role models with diverse social identities in external communication

Support individuals in leadership positions to talk about advantages of having a more diverse workforce (e.g., in videos or articles on company website)

Provide information to prospective job applicants on company efforts to maintain a welcoming, inclusive women-friendly, and equal opportunity work environment where women applicants and those with diverse social identities can grow their careers. Create a profile on various job and recruiting websites (e.g., StepStone, Glassdoor, LinkedIn, Comparably, etc.) and clearly state the importance of gender equality and D&I to the corporate brand; use real testimonials from female and male employees with diverse social identities to showcase the company's commitment

Present the company as an employer of choice at regional job fairs, career days at universities, specialized career events, etc. Potential applicants often have a negative perception of companies with a low percentage of women in the workforce, such as organizations that may be perceived as workplaces "appropriate" for only male staff, with heavy-duty, noisy, and dirty jobs, with a culture where women may not feel comfortable or welcomed

Showcasing the company as a good place to work may be a new concept for organizations and other companies with a strong technical focus and ingrained maledominated culture

Company has stringent communication policies and practices highlighting female and male role models with diverse social identities on the website and on job platforms

Increased interest in open positions from diverse target groups that reflect the customers served by the company

Increased positive postings about the company on social media

TABLE I. ATTRACTION AND TALENT OUTREACH

PRACTICE

DESCRIPTION OF PRACTICE

CHALLENGES TO IMPLEMENTATION

WHAT SUCCESS LOOKS LIKE

ATTRACTION

Inspire, motivate, and encourage young girls to study science, technology, and mathematics (STEM) subjects and to strive for a career in STEM industries

Encourage young girls of different ages and with diverse social identities to consider STEM subjects and career paths by exposing them to technical jobs and routines, overcoming stereotypes through playful activities that may include targeted outreach activities, communication efforts, campaigns, and presentations such as:

- Send both female and male managers to kindergartens, primary/ secondary schools, and universities, led by strong female role models, to spark young girls' interest in STEM subjects and professions
- Campaigns and events to expose girls to technical subjects using practical and fun engagement methods such as quizzes and gamification approaches
- Company activities at International Girls
 Day or Bring-your-Daughter-to-work
 day (see below)
- Feature female role models with diverse social identities in external communications
- Organize science/ summer camps for girls, encouraging skills that underlie STEM studies, such as curiosity, problem-solving, creativity, critical thinking, and collaboration

Send both female and male employees who are strong role models to represent the company at events

Provide mentoring for girls by male and female staff with diverse social identities

Identification of suitable partners and related stakeholder management requires time

Can be difficult to identify female role models and male champions who are skilled in effective communication with children

Staff may face time constraints to dedicate time and be involved in activities

Lack of creative ideas for suitable activities in the local context

Safety concerns and regulations at company facilities may be a barrier that needs to be overcome

Contributions made to increase the talent pipeline of women with diverse social identities with STEM degrees entering the labor market, who serve as role models for other women and hence create a virtuous cycle that helps more girls enter the field

Increased number of girls pursuing technical or STEM studies and careers filling up the talent pipeline

Increased applications for open positions from female candidates with diverse social identities

Reduced stereotypes and harmful beliefs held by girls that technical jobs are only suitable for men

Example: STEM Outreach: How Are We Changing the Conversation? (All Together)

Article: How To Get Young Girls Excited about a Career in STEM (Forbes)

Report/Study: The Equality Equation: Advancing the Participation of Women and Girls in STEM (World Bank Group)

ATTRACTION

Invite girls with diverse social identities to become familiar with the company

Invite children, especially daughters of employees, for a one-day event hosted at the company, such as "Bring Your Daughter to Work Day" or an event on International Girls' Day

Provide participants with information about the company business during the event, ensuring that they are engaged in a fun way in technical activities and topics to gain positive exposure to the company operations, which challenge current gender norms

Expose them to female role models from technical areas and in leadership positions as well as to male champions communicating a strong message, that the organization is more than welcoming women from diverse backgrounds at all levels of the organization

Prepare gender-equitable and inclusive communication materials and participant giveaways with positive imagery that challenge stereotypes of men and women

Effective and timely planning, including for promotion/ communication and activities, are essential for success

Selection and preparation of company staff who will interact with the girls is important, as they must act as credible role models and provide the right messaging

Staff may face time constraints to dedicate time and be involved in activities

Lack of creative ideas for suitable activities in the local context

Safety concerns and regulations at company facilities may be a barrier that needs to be overcome

Participation numbers may be low the first year (and typically increase consecutively) may demotivate staff Number of participants with diverse social identities increases with repetition over consecutive years

Employees report back stories and discussions they experienced after the event, with participating girls asking more questions and referencing topics brought to their attention

Involved employees and girls provide positive feedback on the event

Press coverage about the initiative enhances the company's image in the local community

TALENT OUTREACH

Conduct outreach to educational institutions that leads to long-term attraction of female job candidates with diverse social identities Analyze recruiting needs and societal/ educational gaps for recruiting female candidates with diverse social identities, and develop an outreach plan

Develop relationships with engineering or STEM-related clubs at universities and give presentations to students about career opportunities

Identify suitable educational institutions, from kindergarten through vocational training schools and universities, and develop outreach programs with administration and faculty using gender-equitable messages that:

- Inform students that company is an equal-opportunity employer with varied opportunities
- Highlight the company's equal opportunity efforts, showcasing gender equality and D&I practices
- Publicly encourage women to study STEM subjects to qualify them for technical careers

Offer scholarships 91 to women and girls to study in STEM fields

Reach out to parents and feeder schools to allay concerns and encourage female students to pursue careers in STEM

Develop practical and fun campaigns and competitions to attract and expose girls to technical topics, such as an "Energy Academy" or online gamification approaches

Send female and male managers to represent the company and discuss technical topics at summer camps, in kindergartens, and at other venues with kids and, in particular, young girls participating

Host "bootcamp" or pre-apprenticeship programs that specifically target young women to prepare them for skilled labor positions (e.g., line worker, electrician,

Technical schools/universities may have low numbers of women as students registered in relevant courses of study

School leadership may not demonstrate an interest in targeting gender exclusion biases

Organizations such as utilities may be seen as old-fashioned and male-dominated, so they may not be attractive to young people, particularly women with diverse social identities

Inherent perception that work in the industry is only field work or customer service and is therefore unappealing

Organizations such as utilities may have extremely limited financial and human resources to implement new outreach programs and data-tracking systems

Girls and young women get exposure to technical jobs, are encouraged to pursue STEM studies, and prepare for jobs/careers in male-dominated industries

Company positions itself as an attractive employer for women and men

Over the medium- and long-term, the number of women applying for internships and/or jobs increases from targeted schools

Industry's image is strengthened as an employer of choice for young women and men with diverse social identities beginning their careers

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
	welder, plumber, etc.) that women are less likely to know about or pursue.		
	Create an "academy" or program to formalize all of the company's initiatives (e.g., internships, scholarships, mentor programs, etc.) and signal the company's commitment to attracting more women.		
	Implement a sex-disaggregated data tracking system to determine if more students from the targeted outreach apply for internships and/or jobs at the company		

Tool: Adding a Gender Lens to Nontraditional lobs Training Programs (lobs for the Future)

Article: How to Approach Teaching Gender Equality to Boys and Girls (British Council)

Case Study: In North Macedonia, the Future is Female: How a Power Utility is Opening Doors for Girls and Women (USAID)

Report/Study: Regional Mapping: STEM and Digital Skills for Girls (UNICEF)

TAI	I FN1	ITR	FΔ	CH

Use internship programs to promote technical jobs and the company as an employer of choice for women and men with diverse social identities

Create meaningful internship programs which provide insights and positive experiences to students while exposing senior leadership within the company to high-potential young women

Ensure internship outreach communication to schools:

- States the company's equal opportunity policy
- Encourages women to apply and pursue STEM career
- Includes equitable messaging in outreach to parents
- Includes women role models from a variety of positions

Poor quality internship programs may have an adverse effect with unintended negative consequences, such as word spreading in the education system about negative internship experiences (e.g., interns sometimes report that their internship program was ineffective or boring; they didn't receive challenging tasks that helped them to grow; and that they had limited interactions with personnel)

High-quality intern management is required, with commitment from manager to spend the time required to support a positive internship experience, rather than viewing the management as an extra burden in addition to existing job duties

Limited numbers of female students and bias from teachers and parents may limit the flow of information for internship opportunities

Women with diverse social identities from targeted educational institutions apply for internships in higher numbers

Increased number of women accepted for internships in a wider variety of placements

Increased number of women and men with diverse social identities are job applicants from internship pool

Training for internship supervisors is expanded to include gender-equity and non-discriminatory practices

Interns and instructors for interns report high satisfaction with internship program

Female interns with diverse social identities show higher interest in working at the company and within the industry

⁹¹ **Scholarship**. Award of financial aid for a student to further their education. Scholarships are awarded based upon various criteria, such as academic merit, diversity and inclusion, athletic skill, or financial need.

DESCRIPTION OF PRACTICE

CHALLENGES TO IMPLEMENTATION WHAT:

WHAT SUCCESS LOOKS LIKE

in the company in general and/or in the technical areas

and D&I targets and increase balance of women and men within different parts of the organization

Conduct gender gap analysis 94 to use a data-driven approach for target setting, align targets with company or national strategy, develop a stepwise plan to reach targets. and communicate effectively on aim to reach to create buy-in within the organization. Create a business case 95 supporting the set hiring targets for women and individuals with diverse social identities

Become a signatory of an international agreement supporting gender parity, such as "Equal by 2030" or base your strategic approach on global movements such as the Women's Empowerment Principles or the Sustainable Development Goals

Develop structured approach to apply inclusive hiring and recruiting practices and to eliminate bias against women and others with diverse social identities in recruitment (see below) women with similar competencies as a man competing for the same role

Long-term target setting may be counteracted by volatility of the industry or other factors of uncertainty (e.g., limited mandate periods of decision makers)

Practices and workplace environment may not be ready to absorb newly hired women in a positive manner and may hinder women's success

Setting hiring targets or quotas may spur resistance and "affirmative action backlash" where men feel disadvantaged by women and individuals with diverse social identities

Lack of transparency can lead to stigmatization of the hired women as being "chosen for quotas only"

social identities can successfully perform in selection processes and can be hired

Workplace environment shows a welcoming attitude toward newly hired women with diverse social identities and support their success

Retention rate of women with diverse social identities after one to two years shows that the women feel well-equipped for the positions and can be successful

RECRUITING

Participate in (university) career fairs and regional job fairs to recruit qualified women with diverse social identities

Analyze recruiting needs and assess opportunities to intentionally reach out to female candidates with diverse social identities enrolled in relevant education programs at university career fairs or regional job fairs

Prepare for attendance with female role models and male champions at the company, who can answer candidates' questions on working environment and can create a positive perception with targeted candidates

Use multiple channels for advertising before the event, including engagement with partner institutions, key stakeholders, and use of media consumed by target audience

Develop job ads and informational material speaking to both women and men with diverse social identities (see above)

Develop inclusive communication, interview, and assessment process to facilitate follow-up

Offer firsthand opportunities to experience technical tasks and get exposure to technical tools or equipment

Highlight the company's equal opportunity aims and efforts and provide information on company benefits

Follow-up with more in-depth selection process may be time-consuming and requires planning and intentionality

High number of participating companies, time pressure, and limitations in setting (e.g., more, and less favorable locations of exhibit stands) may limit opportunities to meet the right candidates

Cost for promotional materials, additional presence at plenary or as speaker, and better exhibit locations may become a limiting factor

Competition and one-to-one comparison with other companies looking for similar skill sets

Number of career or job fairs with a positive hiring result increased

Pool of female candidates for recruitment processes increased

Number of women hired from targeted universities and job fairs increased, as indicated by data tracking system

Positive correlation of touch points with female candidates, female candidates interested in open positions, and female candidates with diverse social identities hired

AVAILABLE RESOURCES AND TOOLS

Tool: Tip Sheet: Planning a Career Fair for Improving Women's Access to Nontraditional lobs (lobs for the Future)

	Implement mandatory unconscious bias training for all employees involved in the hiring process		por containing or remaine employees
	Make gender balanced shortlists representative of diverse social identities a requirement for open positions		
	Use work sample tests to evaluate the candidate's skills and competencies to avoid bias		
	Apply "blind" selection and evaluation principles, e.g., remove names, pictures, and birth dates from CVs when assessing applications and proposing pre-screened candidates to management for further consideration to reduce unconscious biases		
	Create a Recruitment Policy to formalize all targets and processes, including for hiring interns		

⁹⁶ BEHAVIOR-BASED INTERVIEWING. Type of interviewing grounded in the theory that the most accurate predictor of future performance is past performance in a similar situation. With this type of approach, employers predetermine the core competencies or skills required for success in a particular job. When interviewers ask questions, they are probing for behavior patterns. This technique is also known as STAR: Situation, Task, Action, Result. (Source: TPP Recruitment, Using behavioural interviewing).

⁹⁷ **DIVERSITY HIRING AUDIT.** An audit used to assess the diversity of the hiring process and to identify any potential bottlenecks and discrepancies (e.g., ls it a top-of-the-funnel issue? Or is it a leaking-pipeline issue? See source). (Source: <u>Ideal, Diversity Hiring</u>)

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

Tool: Diversity and Inclusion Checklist Generator (Michael Page)

Article: Diversity Hiring: 6 Steps to Hiring More Diverse Candidates (Ideal)

Article: 5 Vital Workplace Diversity Metrics & How to Use Them (iDashboards)

HIRING

Use internship programs for direct hiring, with gender parity in intern placements and hiring

Use internship programs systematically to assess potential candidates and familiarize them with the company specifics and the company as a favorable workplace for women with diverse social identities

Ensure there is a well-structured and well-run process that includes clear responsibilities and a fair evaluation of outcomes and candidate potential

Offer long-term internships of at least six months as this will provide better results; providing an opportunity for the interns to adapt to the company and show better performance

Follow up with interns between the end of their engagement with the internship program and the start of their employment (e.g., when the student needs to finish studies before they can be employed).

Internships are often used to fill staff shortages during summer periods instead of in a systematic way

Interns are usually students, and the lag time between the end of the mentoring or internship engagement and their graduation may hinder direct employment in the short term Company has a well-assessed pool of interns in place of which at least 50 percent are women and a proportional representation of diverse social identities that reflect its consumers

Increased number of female interns with diverse social identities directly hired, and the female candidate pool for future open positions is broadened

HIRING

Integrate gender equality, parity, and diversity considerations into procurement policies and practices to ensure subcontractor/supplier alignment with the company's gender equality and diversity goals

Influence subcontractors and suppliers to improve their own gender equality and D&I practices and policies through competitive procurement practices

Clearly articulate in procurement documents expectations and requirements on how a contractor/supplier addresses the following, ensuring scoring of contracts and awards include points related to:

 Equity in percentages of women in leadership and technical positions within their contract, with targets for gender equality and diversity where possible Sub-contractors are separate entities with their own organizational practices and policies that may be difficult to change

There may be less oversight or influence over subcontractors

Some issues, such as discrimination or sexual harassment, may be difficult to measure, and subcontractors/suppliers may be reluctant to share such information

Increase in the percentage of women and individuals with diverse social identities employed by subcontractors in the overall workforce and in leadership and technical positions

Increase in the number and percentage of diverse and woman-owned subcontractors and suppliers

Improvement in gender equality and D&I practices and policies adopted by subcontractors and suppliers

PRACTICE DESCRIPTION OF PRACTICE

CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

- Applies gender-equitable and inclusive policies related to EEO, sexual harassment, etc.
- Extend gender equity and unconscious bias trainings and mentorship opportunities to suppliers and subcontractors, with a focus on supporting the strengthening of womanowned businesses

Create small business set-asides for local womenowned businesses from diverse backgrounds that provide services and supplies. Include gender-specific key-performance indicators and targets in the contract and follow-up with regular monitoring and reporting against KPIs from subcontractor/supplier

Conduct a social audit of all suppliers and subcontractors to ensure compliance with the company's code of conduct or other gender equality and diversity goals. This social audit should cover topics such as:

- Discrimination
- Sexual harassment and GBV
- Health and safety
- Working conditions and benefits

ONBOARDING

Communicate company commitment to gender equality, diversity, and inclusion during onboarding Share expectations regarding respect for and contribution to gender equality and D&I by employees, making values an important part of the onboarding process

Review onboarding communication and tools, such as specialized software to ensure content is gender-inclusive and diverse, reflects company policies on gender equality and D&I, and includes gender-reflective questions in new employee surveys⁹⁹

Use e-learning and gamification to inform new hires about important topics, values, and policies related to equality and D&I

Provide a checklist with relevant policies, company values, and other information for the new employee's exposure

Lack of awareness from management, organization, and peers on how important good onboarding is to create an inclusive workplace

Lack of awareness of HR and support staff of their own biases resulting in differences in supporting women and men in the integration process

Organization may not be used to informal learning and information sharing

All new hires feel welcome and fairly treated, experiencing an inclusive work culture from day one

All new employees are aware of their responsibilities and obligations to promote an inclusive workplace culture free of sexual harassment and discrimination against women and individuals with diverse social identities

Onboarding process builds on the experiences and knowledge of existing employees and contributes to increased awareness on the benefits of gender equality and D&I

AVAILABLE RESOURCES AND TOOLS

PRACTICE DESCRIPTION OF PRACTICE

CHALLENGES TO IMPLEMENTATION

WHAT SUCCESS LOOKS LIKE

Article: <u>Understanding and Designing an Inclusive Onboarding Experience</u> (Medium)

Blog: 17 Powerful Employee Onboarding Questions You Can Use (Culture Amp)

ONBOARDING AND TRAINING

Create standardized training plan with must-have trainings for all employees

Identify essential employee trainings in a training plan with:

- Clear goals and timelines
- Tools to track employee training progress
- Measures to ensure that trainings are conducted without bias and support company values on gender and inclusion
- Measures to ensure women and men have equal opportunities to participate and indirect discrimination is counteracted

Typical must-have trainings include:

- Corporate strategies and policies, including company values and guiding principles (e.g., performance management, leadership values, etc.)
- Tools used within the company (e.g., communication tools, time tracking tools, project management tools, etc.)
- Anti-discrimination, gender awareness, unconscious bias
- Health and Safety

Company may lack structured process to assess must-have trainings and setting up training plan

Training and skill development may happen on an ad hoc basis, but not with a long-term plan

Company may not have sufficient resources to train all employees at once

Good training plan in place with mid-term and long-term goals and target groups identified

Gender gaps can be addressed through trainings for different target groups

Gender equality, D&I, and other values are addressed in standard trainings or through specialized trainings

Women and men feel equally well-equipped to perform within the company

AVAILABLE RESOURCES AND TOOLS

Tool: 13+ Sample Training Needs Assessment Templates (Sample Templates)

Tool: A tool for assessing the gender impact of spending on skills and training (Close the Gap)

TRAINING

Create training plan for each employee with a focus on exposure of women to other work areas and duties to achieve skill parity Conduct individual and organizational sexdisaggregated functional training gap analysis for individual employees on competencies, skills, and knowledge they need to acquire to be effective in their roles as outlined in job descriptions, especially where women with diverse social identities are underrepresented Company may lack a structured process to conduct assessment

Analysis may require external support from an expert and resources

It may be difficult to address different training needs for women and men without introducing new bias Skills gaps assessed for individuals and within functional units

Gender equality gaps are addressed such that women and men feel equally equipped to perform within the company, including in traditionally male-dominated functions and roles

TABLE 3. ONBOARDING AND	TRAINING		
PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	What success looks like
	Close individual and organizational/ department skill gaps and imbalance through trainings with a strategic aim for	Training and skill development may happen on an ad hoc basis, but not with a long-term plan	Sufficient number of women and men are equally qualified for different positions (long-term)
	exposing more women and individuals with diverse social identities to training and	social identities to training and oment opportunities company may not have sufficient resources to train all employees at once company may not have sufficient resources to train all employees at once	Training plan in place for each employee
	development opportunitiesDevelop training plan for each		All employees able to attend trainings without additional burden outside of work hours
	employee and make sure to include measures explicitly aimed at guaranteeing exposure and/or upskilling for women to new but important areas of expertise If the analysis reveals that women are under-skilled in certain areas, invest in a training solution that targets women to achieve skill parity	Planners and trainers may not be sensitive or aware of the nuances and needs of holding training sessions at times convenient for all their employees and via methods that are most effective for different audiences	Employees benefit from learning opportunities, and overall KSAs improve
	Track differences between women and men, including those with diverse social identities, as this will provide helpful information for recruiting and onboarding		
	Accommodate unique gender-based constraints of trainees when formulating logistics and timing, platform, and approaches		
	Ensure opportunities include both group learning and individual learning plans to close knowledge, skills, and abilities (KSA) ¹⁰¹ gaps		
	Develop different training formats and ensure childcare needs are taken into consideration (e.g., allow training attendance from remote workstations or by using online options to ensure women are not excluded due to traditional family roles)		
	Ensure trainings are held within regular office hours so that individuals, especially		

¹⁰¹ KNOWLEDGE, SKILLS, AND ABILITIES (KSA). These are what an employee needs to meet the requirements of a job. (Source: HR.com, Glossary of HR and Employee Benefit Terms)

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
	women, are not over-burdened with conflict with childcare responsibilities		
	Ensure learning opportunities are fully supported by the company and are offered through a variety of modalities, such as online learning, job rotations, ¹⁰² and classroom learning		
AVAILABLE RESOURCES	AND TOOLS		
Tool: 13+ Sample Training Nee	ds Assessment Templates (Sample Templates)		
Tool: A Tool for Assessing the	Gender Impact of Spending on Skills and Trainin	ng (Close The Gap)	
TRAINING Develop and conduct gender awareness, anti-discrimination, diversity and inclusion, and unconscious bias trainings	Develop detailed training plan to integrate gender awareness, anti-discrimination, D&I, and unconscious bias trainings targeted to all levels of the organization, integrating this content within all trainings to support strategy implementation and mindset shift Develop standardized gender awareness, anti-discrimination, D&I, and unconscious bias training materials and/or partner with training providers Include anti-discrimination, gender awareness, unconscious bias, and sexual harassment topics in onboarding trainings Strategically select target groups for various forms of learning on these topics, including: Senior managers	If the company lacks in-house capacity to deliver gender awareness, unconscious bias, D&I, and anti-discrimination training, then it may have to be outsourced at a cost Focusing on one aspect of the above may be required to support strategy implementation and/ or tackle current needs of the organization Developing or adjusting tailored trainings for different target groups may require external support and budget	Detailed training plan, including budget, approved by senior leadership to train all levels of the organization Training material developed to and delivered by a qualified and skilled training provider Related training provided on a regular bas with the aim to have all senior managers and employees trained All senior managers and employees are aware of their responsibilities and obligations to promote an inclusive workplace culture free of harassment and discrimination Employees report higher satisfaction with workplace culture
	 Gender equality and social inclusion groups, company change agents, ambassadors, or focal points Hiring and promotion committees Employee representatives (e.g., members of the union) 		Gender equality and social inclusion group (change agents, ambassadors, focal points) feel well equipped to be active roles and convincing change agents

Male and female role models

¹⁰² **JOB ROTATION.** Practice of transferring employees for temporary periods of time between varying jobs within an organization, which is often used as a training and development method. (Source: <u>Society for Human Resource Management, Glossary of Human Resources Management Terms</u>)

TRAINING

Provide company-wide employee and specialized management training on Develop training plan for informing employees on gender-related strategies and related policies or codes of conduct as part

Training cost and time of employees

Training is one part of strategy
implementation, but ineffective if company
commitment is weak, senior managers do

Employees understand the strategy and related policies and can identify themselves with the underlying objectives

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
gender equality and diversity strategies, policies, and codes of conduct ¹⁰³	of the change management 104 process and strategy implementation	not "walk the talk," or issues and challenges raised are ignored	More of the desired behavior, action, and mindset is visible
	Inform managers and other employees about the strategic objectives of the company with regards to gender equality and D&I and create positive momentum for strategy implementation	Issues and resistance that are raised during trainings should not be mistaken as indication that the strategy is bad, but as a sign of learning and engagement toward change	Grievances are reported and severity decreases over time
	Create additional buy-in through awareness raising sessions and discussions and provide opportunities for employees to raise concerns and discuss issues and challenges		
	Provide a platform for exchange on success stories and strategies to overcome challenges		
	Gather information from employees to adjust strategy implementation, if required		
AVAILABLE RESOURCES	AND TOOLS		
Guide: Integrating Gender into			
Guide: Gender Equality in Cod	es of Conduct Guidance (BSR)		

TRAINING

Provide training to all male and female employees and managers on what sexual harassment is, how to prevent it, report it, and respond to it with a survivor-centered ¹⁰⁵ approach

Provide sexual harassment training by a very skilled and qualified practitioner only, who understands all nuances of sexual harassment prevention and survivorcentered response, to all employees, with an emphasis on managers and men to socialize the policy, how to prevent to it, respond to it, and report and address it

Traditional/historical acceptance of inappropriate behavior may function like social filters and may limit the learning

To accept and learn behavioral change needs a variety of different learning forms and often more than one learning event

Co-educated groups may be tricky to lead due to the sensitivity of the topic and issues for potential survivors to express Employees and managers awareness are increased, with improved skills to prevent and respond to sexual harassment in the workplace with a survivor-centered approach

Potential victims and survivors know about reporting and grievance management mechanisms and are using them

¹⁰³ **CODE OF CONDUCT.** Also known as Code of Ethics, it is a central guide that is meant to clarify an organization's mission, values, and principles, linking them with standards of professional conduct. (Source: Ethics & Compliance Initiative, Glossary)

¹⁰⁴ **CHANGE MANAGEMENT.** Structured approach to transitioning individuals, teams, and organizations from a current state to a desired future state, to fulfil or implement a vision and strategy. It is an organizational process aimed at empowering employees to accept changes in their current environment. (Source: <u>ILO International Training Center, Handbook on Gender and Organizational Change</u>)

¹⁰⁵ **SURVIVOR CENTERED.** A survivor-centered approach facilitates a process in which a victim can become a survivor. It prioritizes the best interests and needs of the person who has experienced harm and returns power to the victim at every stage of the grievance management mechanism and process. It recognizes that a person can experience harm even if the offender did it unintentionally. It also recognizes that the impact of an action is more important than the intent of the person who acted. (Adapted from <u>USAID</u> and <u>Lindsey Jones Renaud</u>)

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	What success looks like
	with related grievance management, 106 including:	themselves, especially when perceived violators may be in the same room with survivors	Potential perpetrators' awareness increased about expected behavior and consequences for misconduct
	 Information on policy foundations, aims, and principles Clear definitions on what constitutes sexual harassment and gender-related harassment Principles and norms of professional behavior expected in the workplace 	Single-sex trainings limit opportunities for potential perpetrators to learn Unskilled managers and HR personnel may not have depth and breadth of training to appropriately handle questions and comments in trainings that place responsibility or blame on women or victims of sexual harassment (e.g., trainee signaling the need for a Dress Code Policy targeting women to dress more conservatively, and trainer unable to respond and correct this as wrong within a large group setting), which may reinforce existing harmful stereotypes and attitudes, and cause more harm	Victims of sexual harassment and GBV are supported emotionally and mentally by trained professionals and are empowered to make their own decisions on what is best for them, including whether or not to file a formal report
	 Survivor-centered approaches include providing independent third party 		Independent investigations outside of the organization
	emotional/ mental counseling support options separate from reporting		Perpetrators are appropriately punished
	mechanisms; victims/ survivors choose when, how, and if they would like to make a report with support they need; independent third-party investigations		Employees increasingly report that the work environment is perceived as conducive and safe, and the conduct of colleagues and managers is respectful
	outside the organization are conducted by trained professionals; and		Reporting on sexual harassment may increase in the beginning with awareness
	perpetrators are appropriately punished Grievance management mechanisms and consequences for violations		Incidences of sexual harassment decrease over the long run as employees understand what constitutes sexual harassment and the consequences
	Training provides opportunities to discuss and learn from each other; if women don't feel comfortable participating in mixed trainings, provide single-sex trainings, but ensure that nuances about incidents that cultivate empathy and understanding is provided on an anonymous basis to both		Results of sexual harassment climate surveys improve over time
	Assign managers responsibility to monitor, prevent, and respond to sexual harassment with training on various survivor-centered tools and approaches available for their use		

¹⁰⁶ **GRIEVANCE MANAGEMENT.** Regulates all processes for receiving, investigating, responding to, and closing out complaints or grievances in a timely, fair, and consistent manner. (Source: Inc.com, Grievance Procedures)

TABLE 3. ONBOARDING AND TRAINING

PRACTICE DESCRIPTION OF PRACTICE

CHALLENGES TO IMPLEMENTATION

WHAT SUCCESS LOOKS LIKE

Conduct sexual harassment climate surveys on a regular basis to monitor progress and identify remaining issues

AVAILABLE RESOURCES AND TOOLS

TRAINING

Provide leadership and technical skills training to women to prepare them for new roles and responsibilities Design and conduct targeted training and workshops for female employees, focusing on leadership skills and other skillsets that women report as underdeveloped or have been identified through skill gaps analysis including technical training.

Use training needs assessment data to inform tailored content selection

General potential training content:

- Program management or training on management tools used in the company
- Industry-specific training to increase knowledge on different business segments
- Soft skills including self-awareness, confidence, self-esteem, self-perception

Modules for leadership training can include:

- Successful leadership and people management skills
- Project management, strategic work planning, and delegation of tasks

Costs required to roll out the training activities (considering any accommodations for off-site training)

Opportunity costs to women for time away from core work

Affirmative action backlash and perception by male employees that the opportunity provided to only women discriminates against men

Stronger pipeline of women candidates equipped with leadership skills and prepared to step into new opportunities

Stronger pipeline of women candidates equipped with technical skills for specific work areas

Greater number of women prepared to model confident, inclusive leadership to colleagues across the company

Increased number of women promoted into leadership and management roles

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE

Performance management is an ongoing process of communication between a supervisor and an employee to accomplish strategic objectives of the organization. Compensation and benefits include tangible and intangible rewards for employees that adhere to legal requirements and enhance employability, attraction, retention, and motivation of talent.

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
PERFORMANCE MANAGEMENT	Develop structure and process for a fair and unbiased performance management and appraisal system	Establishing a high-quality performance management system requires time and resources	Performance ratings accurately assess the performance of each individual employee and are used for development of the
Design and implement a fair and unbiased employee performance management 107 and appraisal system and process	If such system already in place evaluate for potential bias e.g., by analyzing ratings given to male and female employees, analyzing quality of targets assigned to male and	Human Resources Department access to performance agreements and reviews not granted due to non-transparent process Performance targets for the organization	employee Managers are fully trained on how to assess and rate performance Employees feel empowered to actively plan
	female employees and evaluating feedback from male and female employees to their supervisors	not monitored Managers setting targets do so inconsistently and with varying quality	and perform Employees feel motivated and engaged to contribute to business targets
	Determine the root cause of the bias and develop corrective action based on the root cause	Pressure to use business performance metrics that the individual employee cannot	Women and men can equally reach high performance scores
	Include gender parity or diversity and inclusion targets and key performance indicators for managers	influence may create frustration The performance management system may be prone to systematic bias when ratings	
	A good quality performance management process and system include:	impact a pay raise. For example, all ratings are at the top of the scale, so all employees receive maximum raise	
	 Transparent process of target setting in the beginning of the performance period (targets for each employee visible to HR) Good mix of individual targets and targets, which are linked to overall business performance of the company Individual learning targets for each employee Logged performance talks on a regular basis, at least once in the middle of the

Conduct salary gap analysis to determine if there are gender differences and adjust salaries to close identified gaps Conduct periodic salary analyses to determine gender-based pay gaps:

- Within a job category, such as "Junior Engineer"
- Between job categories, such as "Office Manager" and "Field Office Manager," when both have the same duties but have different salaries and are dominated by one gender

Develop, implement, and communicate a clear and transparent process to remove salary inequities, and track them over employees' careers

Some job categories do not currently have enough women to conduct a valid salary analysis

It is difficult and requires time to correctly assess two different job categories to determine if they should be valued the same or differently

Employee and manager push back regarding salary adjustments for impacted female employees

Difficulty in assessing how reduced worktime for women affects merit pay increases (quality vs. quantity)

Company periodically conducts salary data analysis and addresses salary inequities (i.e., adjust salary of affected person or group)

Corporate-level commitment to pay equity is communicated regularly throughout the company

HR department and managers are held accountable for salary equity enforcement and related benefits, such as pension plans and training for retirement planning

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

Use certified tools to undertake external salary gap analysis such as PayAnalytics or EDGE certificate

Costs of external assessment process

Report/Study: State of the World's Fathers 2021: Structural Solutions to Achieve Equality in Care Work (Equimundo-US)

Report/Study: A Review of the Evidence on How to Cover all Families for Paid Family and Medical Leave (WORLD Policy Analysis Center)

Article: 4 Policies That Encourage a Family-Friendly Company Culture (Justworks)

BENEFITS

Create working conditions that support improved reconciliation of work life and family life for women and men with care duties Create benefits that promote work-life balance such as flexible working days/hours, including work from home and support mechanisms for employees (women and men) with childcare or other care duties

Allow for paid time off options that may be used instead of sick leave or other kinds of leave, without the need to monitor the reasons for its use

Company-sponsored leisure or family activities can encourage time away from work

Limit expectations on both the company and employee side regarding extra work hours or days

Conduct a company-wide survey that identifies what work issues most affect employee work-life balance and health or happiness factors, and design solutions that address these

Establish a work culture where productivity is prioritized over physical presence

Ensure senior leadership and managers, including men, are modeling work-life balance

Provide leave options, which meet or exceed the legal framework for parental

Mistrust from managers and other employees when women or men use flexible working or leave options

Lack of acceptance by managers due to limited focus on related change management efforts to be undertaken, when introducing new work schemes

Flexible work options can backfire, when departments are understaffed, or managers have weaknesses in delegating tasks in an unconscious manner

Employees using flexible work options or leave arrangements can get stigmatized and left out (e.g., through non-assignment of important tasks or those that create visibility for the employee) if the corporate cultures are not supportive

Terms not clearly defined or communicated

More advanced options may require more planning and resources for external support or for implementing IT systems to manage flexible working, work from home and leave options

Telecommuting options appear limited in tech or other resource-constrained companies

The company benefits from providing more flexibility and increased work-life balance through higher productivity of employees working with focus, reduced absenteeism during work hours, higher satisfaction rate of employees, better retention and motivation of qualified staff and reduced costs for replacement of employees, who do not return with full capacity after taking leave

Employees are more satisfied and exercise some of company's work-life balance provisions, increasing retention and work quality or productivity

More women are attracted to and stay with companies with work-life balance options

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

leave, 108 maternity leave, 109 paternity leave, 110 and family leave 111

Make "leave management" a mangers' duty and clearly define responsibilities for managers and employees to ensure women and men who are using parental leave options can hand over duties in a structured way and can return after leave without impediment or negative impact on their careers

Inform employees and managers about legal and policy framework related to flexible working arrangements, leave options, work from home, and other benefits the company offers to better reconcile work life and family life

¹⁰⁸ **PARENTAL LEAVE**. A benefit designed to provide employees with approved paid or unpaid time off following the birth or adoption of a child. (Source: Society for Human Resource Management, Glossary of Human Resources Management Terms)

¹⁰⁹ MATERNITY LEAVE. Maternity leave is the period of time in which women are legally allowed to be absent from work in the weeks before and after birth. Some companies also grant a limited number of days in case of adoption of a child.

PATERNITY LEAVE. A benefit designed to provide fathers of newborn children with paid or unpaid time off from work following the birth of the child. Some companies grant a limited number of days in case of adoption of a child. (Source: Society for Human Resource Management, Glossary of Human Resources Management Terms)

FAMILY LEAVE. Benefit for employees to take paid or unpaid leave for serious family issues. Such reasons may among others include adoption, pregnancy, foster care placement, family or personal illness, death of a family member, childcare needs, and support for administrative procedures for close family members. The reasons covered under this benefit vary depending on national laws and/or company agreements.

Article: 5 Ways Managers Can Support Pregnant Employees (Harvard Business Review)

Example: Work-Life Balance: OECD Better Life Index (OECD)

BENEFITS

Institute an inclusive employee health and wellness program to improve the health, well-being, and productivity to support all female and male employees

Align the employee health and wellness program with demographic profile and needs of all female and male employees with diverse social identities, taking industry-specific health risks into account

Design interventions using a data-driven approach to address needs by conducting a health risk assessment for specific job categories and related to workforce demographics

Use employee surveys to evaluate the personal health and wellness needs of employees, ensuring both mental and physical health are addressed

Conduct health culture audits to assess potential workplace impact on employee wellness behavior

Develop strategy with supportive business case demonstrating the return on investment for the program to obtain management buy-in and allocate sufficient budget

Create a structure to ensure coordination and implementation of the initiatives (e.g., wellness committee)

Lack of resources and budget lead to ad hoc, one-time measures that may be perceived as lip service, rather than genuine interest in the health and well-being of employees

Unequitable access for employees to the programs can create feelings of favoritism

Managers may not be willing to allow employees time away from KPI driven duties, and employees may be unwilling to spend additional unpaid hours at work.

Lack of visible sponsorship and modeling can undermine the effectiveness of the program (e.g., while leadership might endorse the program, they are not participating or "walking the talk")

Interventions are designed to meet the specific health risks related to the industry demographic and business and are designed in a way, that they do not perpetuate harmful stereotypes, but still address health risks stronger related to one of both genders

Female and male employees report that the programs address their needs and are using the services

Positive effects, such as increased productivity, less absenteeism, 112 and better physical and mental health can be measured

Employees demonstrate increased resilience to avoid and overcome challenges in their lives and reach out for support when seek support when needed

¹¹² **ABSENTEEISM.** Failure to show up for scheduled work. The main reasons for being concerned with absenteeism are increased cost to the organization, clues about employees' mental and physical health, and employees' job satisfaction. (Source: <u>resourcing edge, Human Resource Glossary</u>)

TABLE 4. PERFORMANCE MAN	NAGEMENT, COMPENSATION, AND BENEFIT	TS

Study: How Employers Can Better Support Employees with Mental Health Issues (Emerald Insight)

BENEFITS

Review infrastructure gaps to ensure that the workplace has adequate facilities to accommodate women and other diverse social groups Conduct an infrastructure assessment of all company sites (including in the field) to evaluate where there might be gaps in infrastructure (e.g., separate toilets and changing rooms, accommodations for night shifts, lactation rooms, etc.)

Survey employees to identify which infrastructure or facilities are most needed with data disaggregated by sex and office site location.

Conduct a cost-benefit analysis for adding infrastructure or other facilities to rectify any gaps identified.

Consider whether any infrastructure gaps might be leading to incidences of GBV and if identified, prioritize solutions that mitigate this (e.g., separate toilets or changing rooms for women and men).

The cost of building new infrastructure might not be financially feasible.

Offices or field sites with very few women might not see the value in adding additional facilities for a small percentage of staff.

Women and men have access to safe, private, and separate facilities, and are comfortable using them in the workplace.

Other diverse social groups that might experience discrimination as a result of inadequate facilities (e.g., persons with disabilities, LGBTQI+ persons, etc.) feel comfortable using workplace facilities.

Infrastructure or facilities are maintained for safety and comfort for all employees.

Incidences of GBV related to a lack of infrastructure are reduced.

TALENT DEVELOPMENT

Provide mentoring for women with diverse social identities to cultivate their talent and mentoring for men

Create high-quality mentorship programs for women and men with diverse social identities at different career levels with specific gender equality and diversity goals

Provide clear structure and dedicate sufficient resources including:

- Clear targets and quality standards
- One person in charge of coordinating the program, and acting as a point of contact for mentors and mentees
- Mentors who are trained to be aware
 of and eliminate gender and diversity
 bias in supervision and who create a
 positive environment for both women
 and men, with clear instructions on
 benefits, targets, and roles, and
 establishing the relationship
- Encourage diverse mentor-mentee relationships; in addition to same sex mentor-mentee relationships (e.g., women mentoring women or men mentoring men), strategically match men to mentor and help advance women, as well as female leaders to develop, support, and advance men to orient men early in their careers to respect women in positions of power
- Constant evaluation, integrating feedback and suggestions from mentors, mentees, and their supervisors

Senior staff may perceive their role as an additional burden

Senior managers or supervisors may be reluctant to assume a mentoring role for female employees

Powerful biases that are the exact reason that this match is critical for transforming individuals need to be overcome:

- Female leaders may be uncomfortable and hesitant to mentor male colleagues
- Men may not accept to be mentored by a woman
- Corporate culture and \ norms may be unsupportive of men and women establishing a mentoring relationship

Transparent company-wide mentoring program is established with goals, tools, guidelines, and metrics to measure achievements

Mentoring relationships are sustainable as can be seen in numbers and frequency of contacts between mentors and mentees

Women with diverse social identities ask actively for mentoring opportunities

Increased number of women with diverse social identities who participated in mentoring are perceived as good performers and/or get promoted to next level

Training for mentors is expanded to include gender-equality and non-discriminatory practices

Mentoring candidates, mentors, and supervisors of mentees report high satisfaction with quality of mentoring and target achievement

Mentor becomes a sponsor of the candidate (see below)

Diverse mentor-mentee relationships are established

Male employees mentored by female leaders become male leaders and champions of equality, supporting

TABLE 5. 		DEVELOPMENT

PRACTICE

LEADERSHIP DEVELOPMENT

Introduce job sharing ¹¹³ for management functions and other key roles

DESCRIPTION OF PRACTICE

Implement job sharing and leadership sharing opportunities for women with diverse social identities:

- Expose them to new roles and responsibilities or to new business areas within an organization
- Provide them opportunities to grow into a new position and to learn from a more experienced person with whom they share duties
- Better reconcile work-life and familylife duties especially in times of transition such as return from maternity leave with reduced working hours

Identify suitable job-sharing opportunities and pair women with partners who have high awareness of their responsibility to make the arrangement work

Support job sharing candidates to make independent and cooperative decisions about job sharing, including splitting responsibilities, tasks, and reporting lines, with good communication and knowledge sharing system (e.g., common drives, access to each other's emails, etc.)

CHALLENGES TO IMPLEMENTATION

Bad pairing, strong competition, and lack of understanding for the need to work as a team to be successful can harm the success of job-sharing opportunities

Co-workers and management may resist change needed to adapt to the model

Company culture and politics that may not be in favor of successful women can threaten those sharing a job (e.g., complaints about the person not being available full time)

WHAT SUCCESS LOOKS LIKE

Job sharing model is in place and used by the organization to retain and support talented women

Women who have used job sharing models can continue in challenging key positions and in leadership roles afterwards

Managers of those who are sharing a job report high satisfaction with the performance of both candidates

Retention rate of talented women with diverse social identities in management or key functions after maternity leave or with part-time working arrangements increased

AVAILABLE RESOURCES AND TOOLS

PRACTICE

LEADERSHIP DEVELOPMENT

Provide on-the-job learning opportunities, such as job shadowing¹¹⁴ and job rotations, especially for business areas in which women are underrepresented

DESCRIPTION OF PRACTICE

On-the-job learning opportunities create exposure for women to working areas in which women are underrepresented or where the company wants to attract more women and expose managers and staff in these company segments to women as potential colleagues, which may reduce resistance to hire more women

These opportunities may include:

- Job-shadowing (single days or for a certain period of time)
- Working on different job locations and in different business segments for a limited period of time
- Buddying with somebody from a different department and/or business segment with structured exchange facilitation to learn about the specifics of their work
- Cross-functional project assignments or other assignments that require the person to collaborate more closely with other departments
- Research or data collection assignments that expose the person to other business areas and support their understanding of the specifics of these business areas

Develop high quality programs with a clear structure including:

- Clear strategy and targets and quality standards for each program in place
- One person in charge of coordinating the program, acting as point of contact for learners and supporters

CHALLENGES TO IMPLEMENTATION

Supporters may not be aware of their role as ambassadors and role models for their specific business area

Supporters may face comments or jokes from co-workers due to cultural boundaries between women and men

Supporters may experience their role as burdensome, especially in cases of bad matching

WHAT SUCCESS LOOKS LIKE

A variety of on-the-job-training opportunities are in place supporting women to leverage their skills through interpersonal learning and exposure to working areas within the company, in which women are underrepresented or more women are desired to work

Supporters of on-the-job-learning opportunities have been trained/instructed to act as role models with regards to gender and as ambassadors for their business area

Feedback from supporters and candidates is positive

Women become interested in working in one of the job areas they were exposed to

Managers' mindset of working areas with less women is more supportive of having women in their departments

¹¹⁴ JOB SHADOWING. Type of on-the-job employee job training in which a new employee, or an employee desiring to become familiar with a different job, follows and observes a trained and experienced employee. (Source: The Balance Careers, Job Shadowing is Effective On-The-Job Training)

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
	 Identification of target group and suitable supporters and quality matching process in place Training or clear instructions for supporters Constant evaluation and integration of feedback from learners and supporters 		,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
	Instruct supporters to create a positive image of the job area and act as role models with regards to gender values in their role, as ambassadors for a specific job area		
	Job rotations can also increase opportunities for women to work for more than one supervisor and increase opportunities for more unbiased and fair evaluation of their performance		
AVAILABLE RESOUR	CES AND TOOLS		

Article: <u>Job Shadowing – Why the Big Fuss?</u> (FundiConnect)

RETENTION AND EMPLOYEE ENGAGEMENT

Efforts and ability of an organization to maintain a working environment which motivates and engages current staff, resulting in identification with the organization and retention of talent.

TABLE 6. RETENTION AND EMP	PLOYEE ENGAGEMENT		
PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
RETENTION Use workplace climate and employee satisfaction surveys to identify gender equality and diversity and inclusion challenges	Design and administer survey according to global best practices (e.g., validated surveys are disaggregated by sex and other social identity factors) Design survey to ask questions to better understand issues related to gender equality, D&I, sexual harassment, and discrimination, including the following examples: I feel well respected by my supervisor/co-workers Management shows, through action that diversity and/or gender equality is one of the highest priorities of the company. Job promotions are fair and based on the principles of equality The performance of women and men is evaluated with the same accuracy OR with fair judgment. Diverse perspectives are valued and encouraged in my team I am comfortable voicing my ideas and opinions, even if they are different from others In my department or work unit, people are treated respectfully, regardless of their differences I feel a good gender balance within the organization The behavior of our senior leadership team is consistent with this company's value My CEO prioritizes gender diversity	Multiple modalities (e.g., phone, computer, paper) may be needed to reach all employees Union employees may be required to complete the survey on company time and phone-based surveys may be prohibited If surveys are outsourced, the survey company may increase the cost for the additional service of disaggregating data Invalid surveys (e.g., surveys that are not well designed) could result in inaccurate results or gender bias	Employee satisfaction surveys are conducted periodically, and data are disaggregated by sex Data are analyzed and used to inform decisions to further advance gender equality Women and individuals with diverse social identities increasingly report satisfaction

department performance plan)

TABLE 6. RETENTION AND EMPLOYEE ENGAGEMENT

PRACTICE

DESCRIPTION OF PRACTICE

CHALLENGES TO IMPLEMENTATION

WHAT SUCCESS LOOKS LIKE

EMPLOYEE ENGAGEMENT

Organize informal talks between the CEO and employees, ensuring inclusion of women with diverse social identities Organize informal meetings such as breakfast, lunch, or coffee with the CEO with the goal to foster connection, belonging, and relevance in the company culture; this will not only foster the relationship between employees and management, but will also lead to crossfunctional exchange between employees

Invite male and female employees to participate or set up a raffle/lottery to win a spot at the event

Target invitations to women so they may attend these meetings and talk about challenges/difficulties faced by female employees at the firm, proactively engaging and empowering women so their concerns are heard by the head of the organization

There may be limited time and financial resources to organize these events

Employees may be reluctant to sign up or participate in the event due to fear or unease about talking to the CEO or upper-level management

Open and "eye-to-eye" culture is needed for this format to be successful

Challenges with the CEO following through with commitments to host events regularly, may result in a poor internal reputation for consistency

Meetings result in high potential team members being "discovered," new and innovative ideas and/or problems identified along with suggested improvements

Female employees are given a platform to discuss challenges and propose improvements for the organization

AVAILABLE RESOURCES AND TOOLS

¹¹⁵ **KEY PERFORMANCE INDICATOR (KPI).** Critical (key) indicators of progress toward an intended result. KPIs provide a focus for strategic and operational improvement, create an analytical basis for decision making and help focus attention on what matters most. As Peter Drucker famously said, "What gets measured gets done." (Source: KPl.org)

TABLE 6. RETENTION AND EMPLOYEE ENGAGEMENT

PRACTICE

DESCRIPTION OF PRACTICE

CHALLENGES TO IMPLEMENTATION

WHAT SUCCESS LOOKS LIKE

EMPLOYEE ENGAGEMENT

Leverage existing women's and diversity networks to support development of good practices

Use well-established networks to generate ideas for improvements, give women and men with diverse social identities a voice in the change management process, and ask members to act as ambassadors for planned interventions (e.g., reaching out to employees in remote locations and onboarding them)

In order to make these networks effective it is important to:

- Define purpose, roles, and targets for the network
- Agree on frequency and rules for agenda setting, invitation of external input providers and means of collaboration between the network and the organization

In many companies, women and diversity networks have been established in phases, to create a safe space to discuss gender equality and D&I issues and needed improvements, but over time the aims and direction of these networks get lost, and the networks fail to create impact within the organization

Women and men with diverse social identities may be reluctant to participate because they do not want to be perceived as having the need for a support group, or sometimes do not want to be seen as being aligned with other women and individuals who share their identity

Women may not have time for networking and events outside of business hours due to family responsibilities

There may be weak/lack of support from management and the CEO

Women and diversity network is well established and has a purpose

Members of the network are perceived as strong partners for change management interventions and act as ambassadors for new measures

The network is used by employees as an informal entry point for ideas, complaints, and feedback on gender equality and D&I interventions

SUCCESSION PLANNING AND PROMOTION

Systematic and long-term process of identification and development of potential successors for key positions to ensure that an employee's knowledge, skills, and abilities are developed to fill key roles.

TABLE 7. SUCCESSION PLANNI	NG AND PROMOTION		
PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
SUCCESSION PLANNING	Ensure succession planning is the process	Companies may not have succession plans	Gender-equitable succession plans are
Establish and implement	of identifying long-range needs and cultivating a supply of internal talent to meet those future needs	in place	written and implemented, specifically closing gender gap and pay equity gaps through a primary focus on recruitment, retention, development, and accountability activities
succession plans 116 that are inclusive of women with diverse social identities		Promotion is often seniority-based	
	Use succession plans to anticipate the future needs of the company and assist in finding, assessing, and developing the necessary human capital (internal and external)	In some countries, performance appraisal ¹¹⁷ is between the supervisor and employee and not shared with HR, so those appraisals cannot be used for succession planning	
			Increasingly, equal representation is achieved in leadership positions (long term)
	Ensure gender-equitable succession plans include the identification of key positions, gender-neutral selection criteria, a plan for how to develop candidates selected and goals for inclusion at all levels of leadership	There may be an unconscious gender bias regarding who should fill a particular position Women may not apply for leadership positions in a workplace that is not	Aspirational goal or quota set for percentage of women selected success candidates
	Set a minimum number or percentage of female participants in the succession training group	specifically supportive of women workers' development

Video: The Career Advice You Probably Didn't Get (Susan Colantuono)

¹¹⁶ **SUCCESSION PLANNING.** Strategy for identifying and developing future leaders at a company — not just at the top but for major roles at all levels. It helps a business prepare for all contingencies by preparing high-potential workers for advancement. (Source: <u>Robert Half, What Is Succession Planning?</u>)

¹¹⁷ **PERFORMANCE APPRAISAL.** Periodic review and evaluation of an individual's job performance. (Source: <u>Society for Human Resource Management, Glossary of Human Resources Management Terms</u>)

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
SUCCESSION PLANNING AND PROMOTION Use skill mapping 118 to support unbiased succession planning and promotion	Establish skill maps for core functions based on industry best practices and adapt to company needs: Skill maps for each function include at least 4 levels to support fair promotion All cross-functional moves and promotions are based on agreed skill profiles	Skill mapping is a resource-intensive process It takes time to establish the system, which can become a challenge for companies undergoing rapid change as the skill pool and related skill maps may quickly change	HR has identified pool of suitable candidates for each skill pool, including women and men Employees have full transparency for all functions and skill levels and can develop relevant knowledge, skills and abilities
AVAILABLE RESOURCES AN	ID TOOLS		
Guide: Skills Mapping Process Gui	de (P-TECH Brooklyn)		
Tool: Skill Maps for Professions at	Utilities (O-NET OnLine)		
Article (incl. Sample Skills Mat	rix Template): What is a Skills Matrix and H	low Do I Create One? (Manager's Resource Ha	andbook)
PROMOTION Develop promotion processes to	Follow successfully proven practices that include:	Company politics may influence decisions on promotions	Promotion committee is functional and used for all promotions
counteract bias in promotions	 Once a year all managers are invited to submit proposals on a set number of employees for promotion 	Women may not be in visible functions and therefore not as known to committee members	
	 The committee assesses all candidates based on their potential to successfully perform in a new role Promotions are granted consensually In case no consensus can be reached, the best candidates are invited to participate in an application process, where assessment of these candidates can be done by an external party 	May be difficult to nominate female committee members when they are underrepresented in leadership roles	
	Establish a promotion committee with equal representation of female and male high-level leaders who meet on a regular basis to evaluate current talent pool and potential of individuals for promotions		

¹¹⁸ **SKILLS MAPPING.** Creating a visual representation of the skills needed to perform well in any given role and comparing that with the existing skills held by employees throughout the organization. This comparison allows gaps to be identified and remedied. (Source: HR Daily Advisor, What Is Skills Mapping?)

- Related objectives and aims
- Company specific business case
- Roles and responsibilities
- Action plan and timeline for achieving targets

Develop a written change management plan that includes gender equality and D&I best practices in short-, medium-, and long-term, with specific goals for each period, and with individuals and teams assigned to implement specific activities

Develop change leaders, change ambassadors, and supporters who are influential or in key positions and help create buy-in

Hold company-wide and division dialogues where women and men may discuss in small groups and interactive training what their corporate culture change goals are, and how to achieve them

Create a committee that is responsible for implementing the change management plan and meets regularly

Conduct regular follow-up and evaluations to determine success of the implementation plan; put in place a process to resolve any issues identified

Assign related targets to senior managers and key functions and make achievement part of their performance

Change management efforts usually start with resistance as they require those who are in a privileged position to leave their comfort zone; it is required to prepare managing resistance

Potential supporters may have time constraints

Change efforts may get stuck after some time, if nobody feels responsible for driving efforts or after first achievements create a sense of "we are doing well" even though they are on the beginning of a long journey

Managers may strive to meet or report requirements without consideration for quality for fear of losing budgetary or other resources if targets are not met

Motivation can diminish as change requires time to show visible and sustainable results

Strategy with clear vision and targets exists, employees are informed about it, and they know how to contribute to achieve the targets

Employees at all levels contribute to ideas for organizational change according to the change management plan

Senior managers and people with high visibility walk the talk and act as role models in the implementation of the strategy

Action plan and related targets are SMART and KPIs are assigned to all key functions, such that performance (e.g., progress against these targets) are measured on a regular basis and processes adjusted if required

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES

CHALLENGES TO IMPLEMENTATION

WHAT SUCCESS LOOKS LIKE

Conduct trainings and discussion groups to inform all staff on the strategy

AVAILABLE RESOURCES AND TOOLS

Guide: Gender Strategy Toolkit (Workplace Gender Equality Agency, Australian Government)

Article: 5 Change Management Best Practices (Whatfix Academy)

CORPORATE CULTURE

Make gender equality, diversity, and inclusion part of the workplace culture

Introduce company values of gender equality, diversity, and inclusion during employee onboarding and throughout the rest of the employee life cycle

Include gender equality, diversity, and inclusion in company mission and values statement

Ingrain a corporate culture and leadership model harnessing diversity

Establish corporate values and practices that make everybody's voices heard and invite women with diverse social identities to speak up such as:

- Rules at company meetings and fora to ensure that women are encouraged to make their voices heard
- Build the expectation that meeting leaders and facilitators elicit input from quieter participants

Key individuals may resist change or resist being held accountable for inclusive actions

Time required to socialize all employment processes with transformational changes and embed within orientations

Gendered social norms or habits of attributing higher value to men's input than to women's input persist

Backlash may result from male participants perceiving a loss of authority

Men and women work productively and cohesively in all business areas

Corporate business goals attained with greater level of success as corporate culture changes and inclusion goals take hold

Women and men with diverse social identities assume increasingly greater share of leadership and management positions across all areas of company

Meeting chair or facilitator manages group dynamics to afford participants equal opportunity to contribute regardless of gender or social identity; facilitator limits behavior which undermines equal participation, such as interrupting/ talking over/disregarding or undervaluing input from women and individuals with diverse social identities

PRACTICE

DESCRIPTION OF PRACTICE

CHALLENGES TO IMPLEMENTATION

WHAT SUCCESS LOOKS LIKE

 Ensure that meeting members demonstrate equal respect/ regard for the opinions of men and women

Upskill women with targeted talent and leadership development focused on effective communication, negotiations, and leadership skills

CORPORATE CULTURE

Support men's engagement through identification of male change agents and motivating them to act as promoters and ambassadors for gender equality

Recognize male employees as critical stakeholders in achieving gender equality in the workplace

Raise awareness among male employees on gender equality issues, toxic masculinity, and how gender equality benefits both women and men Men may be hesitant to become allies or support gender equality activities because they fear being perceived as less masculine or less powerful

Men may not see the personal benefit of being involved in gender equality initiatives or may feel threatened by the idea of empowering women A culture which encourages gender equality partnerships among colleagues is established

Men are allies for female colleagues which supports women in various ways and makes them feel more equal

PRACTICE DES

DESCRIPTION OF PRACTICE

Encourage male employees to become allies and change agents, with active roles and responsibilities identified in job descriptions and/or change management

Participate in the #HeForShe campaign, which asks men to speak out against violence and discrimination against women and girls around the world

Coordinate company and division dialogue where men and women hold small group discussions and interactive trainings sharing what their corporate culture change goals are, and how to achieve them

Support male leaders to amplify and model what male allyship looks like and encourage other male employees to participate in achieving culture change and gender equality goals

CHALLENGES TO IMPLEMENTATION

Men don't easily recognize unconscious gender biases that permeate the organization, and may not recognize the importance of their engagement

Male employees may feel uncomfortable joining a women's network or any events or discussions on gender equality, because they are in the minority

WHAT SUCCESS LOOKS LIKE

Male leaders actively and publicly demonstrate their commitment to gender equality, and encourage others to do so

Men and women at all levels effectively work to support change of culture and gender equality in the organization

Article: Gender Budgeting: A Tool for achieving Equality (Gender and the Economy) **Article:** What is Gender Budgeting and How Can it Help Equality? (Deutsche Welle)

COMPANY PERFORMANCE

Develop and institutionalize targets and/or Key Performance Indicators (KPIs) for individual managers and departments to support gender equality.

Set gender equality and diversity targets for each department, based upon staffing needs, skills gaps, budget, and anticipated staffing levels for the timeframe identified

Ensure that the targets are a realistic reach for each unit, while also aligning with the company's gender and diversity targets. Targets may be set at company, division, department, and individual levels

Create accountability for reaching gender equality targets, by embedding them into manager/supervisor performance reviews, individual or company performance contracts, KPIs, compliance matrices or other performance review frameworks

Utilize available labor market metrics to set SMART diversity and gender equality targets

Performance of managers/supervisors is not related to KPIs, and the KPI system is not used within an organization

Lack of talent maps, competency matrices, or other analyses available to provide a clear picture of staffing gaps and priorities

Limited talent pools with the required skills and competencies

There may be limited willingness or buyin from leadership to set or report on targets for hiring women with diverse social identities

Weak data management systems, making it difficult to monitor and track progress

Resistance or resentment from male staff to setting targets that promote hiring of more women

Lack of incentives to reach targets

Top leadership is not walking the talk and/or has no specific targets for themselves (gender targets are only set for mid management levels)

Departmental targets established, linked with corporate gender equality targets and KPIs, and aligned with corporate business goals

Active engagement of leadership and management to set targets at the unit level and embed those into company performance frameworks

Clear accountability for achieving targets and mitigation measures for failing to meet targets for everyone in a leadership role

Actions taken to adopt recruitment and hiring policies and practices to support achievement of targets

Training and support provided for recruitment and hiring staff and department managers to ensure a successful target-setting process

HR data shared to support the targetsetting process

Communication amongst department heads to ensure alignment of targets

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

AVAILABLE RESOURCES AND TOOLS

Article: How We Set Diversity Targets (Medium)

Article: Strategies to Infuse D&I Into Your Organization (Harvard Business Review)

COMPANY REPORTING

Disclose gender equality and diversity targets and/or KPIs on gender equality and D&I in publicly available reports and indices

Set gender equality and diversity targets and report on gender equality and D&I objectives and performance toward these objectives in the company's annual report, on its website, in a separate gender equality or sustainability report, to realize these benefits:

- Compliance with global sustainability reporting standards such as the Global Reporting Initiative (GRI) which request the disclosure of gender-related indicators and targets
- Supports achievement of the United Nations Sustainable Development Goals (SDGs), especially SDG 5 which calls for gender equality and the empowerment of all women and girls by 2030
- Ensures company measures progress toward achieving gender equality and D&I in a meaningful way

Include in the annual report, website, and in a separate gender equality or sustainability report, the proportion of women employees overall, including senior executives and board members

Measure progress by evaluating company against Thomson Reuters <u>D&l (Diversity and Inclusion)</u> or another Social Responsibility Index to see where scores

CEO commitment to disclose KPIs or gender equality and diversity targets may be weak

Required qualitative or quantitative (sexdisaggregated) data may not exist or may be difficult to obtain

Potential fear from leadership that disclosing data/ information about gender equality and D&I makes the company vulnerable to criticism

Sustainability reporting according to GRI requires time and effort, which may constrain limited available human and financial resources

Quantitative gender equality and diversity targets set with regular annual reporting on performance

Transparency, awareness and visibility on gender equality and D&I increased

Improved public image of company through disclosure of performance in gender equality and D&I practices

Increased number of qualified female candidates with diverse social identities apply to open positions

Potential to be included within the top 100 ranked D&I indices for investors

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

may need improvement to attain top 100 ranking for investor funds

COMPANY PERFORMANCE AND REPORTING

Adopt international standards and endorse_international commitments for gender equality

Become a signatory of international commitments to increase gender equality such as Women's Empowerment Principles or Equal by 2030 and report on progress and related indicators

Join a global network of private sector companies to receive guidance on advancing gender equality and women's empowerment

Benefits include:

- Gain access to resources such as learning and research material and best practice examples
- Benefit from a global network of change agents
- Gain access to an online discussion forum, webinars as well as online and offline events
- Send clear signal to various stakeholders that gender equality and women's empowerment is important to the company as demonstrated by

Lack of awareness of initiatives

Lack of resources to join and follow up on commitments (e.g., needs clear allocation of budget and responsibilities for progressing)

Statement of support for the initiative often needs to be signed by the CEO, which could result in difficulties if there is a lack of commitment

Participation in some initiatives costs money

Lack of time to be an active member of the network

Lack of resources to report on progress

Company has joined/endorsed relevant gender equality/women's empowerment initiatives such as the Women's Empowerment Principles (WEP) or Equal by 2030

Company benefits from network and exchange with global change agents

Being a member of a global initiative increases the company's image and commitment to gender equality

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

top leadership involvement and CEO commitment

COMPANY PERFORMANCE AND REPORTING

Participate in gender equality and diversity awards, rankings, and certification processes

Company actively participates in gender equality and diversity award and certification process with a strategic approach, including regular screening of awards, rankings, and certification processes.

Demonstrate commitment and gains made to achieving gender equality and D&I to current employees, candidates, and other stakeholders to increase visibility and credibility in the job market as an attractive employer that has created a workplace where women and men with diverse social identities are all treated equally

Communicate publicly and often about to gain a competitive advantage in the search for talent

Participation requires time and effort (including human/financial resources)

Required quantitative or qualitative (sexdisaggregated) data for the certification process may not exist or may be difficult to obtain

Management may not see the advantage of the gender certificate and consequently may not approve participation

Company has a list of related awards, rankings and certification processes and uses a strategic approach for participation or non-participation

Company is awarded with a gender certification which can be used as a source for internal as well as external communication and branding

Gender certificates help the company to measure progress ("what gets measured gets done") and to benchmark itself against other companies

Company ranks high in awards or can progress in ranking over time

POLICIES AND GRIEVANCE MANAGEMENT

Documented set of broad guidelines informing staff and management behavior and mechanisms in place to address non-compliance.

TABLE II. POLICIES AND GRIEVANC	E MANAGEMENT		
PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
POLICIES Adopt and implement a gender equality and social inclusion policy	Develop a gender equality or gender and social inclusion policy based on international standards including related targets, responsibilities, and provisions		Gender equality or Gender Equality and Social Inclusion policy is adopted and fully implemented through supporting processes, as detailed in this framework
	for handling grievances Include company gender equality and D&I goals and objectives, measures to achieve them, responsibilities for implementation and indicators for monitoring		Gender equality is an ingrained part of corporate culture and institutionalized in all programs and activities
	Demonstrate a new direction and dedicated commitment to gender equality and D&I goals by developing and implementing a supportive strategy and action plan		
	Implement training programs to raise awareness of unconscious bias and build commitment to implementing the policy		

TABLE 11. POLICIES AND	GRIEVANCE MANAGEMENT

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

Ensure accountability for implementation is with senior leadership

AVAILABLE RESOURCES AND TOOLS

Guide: Integrating Gender into Workplace Policies (USAID)

Guide: Gender Strategy Toolkit (Workplace Gender Equality Agency, Australian Government)

Guide: Developing a Workplace Gender Equality Policy (Workplace Gender Equality Agency, Australian Government)

Example: Gender Equality and Empowerment of Women Policy (AngloGold Ashanti)

POLICIES

Establish a corporate-level equal employment opportunity (EEO) policy

Adopt an equal employment opportunity (EEO) policy statement at the board of directors/ownership level

Disclose board selection process, skills, and gender equality and D&I goals

Ensure that all relevant characteristics are included such as race, religion, color, gender, pregnancy, sexual orientation, marital status, national origin, age, genetic information, military status or disability and any other characteristic protected by applicable law.

Appoint HR or another organizational unit such as a gender equality and D&I department to implement EEO policy and other company gender equality and D&I policies, strategies, programs, and initiatives aimed at promoting gender equality and dedicate necessary financial resources

Establish a multi-divisional gender equality and D&I committee comprised of women and men with diverse social identities to plan, oversee and support the implementation of gender equality and D&I initiatives with the gender equality and/or HR Departments

Create accountability by declaring specific targets and goals on gender equality and D&I and hold the company's leaders

Stakeholders may lack commitment during EEO policy formulation and adoption

Unconscious bias exists within the company

EEO policy is adopted and fully implemented through supporting processes, as detailed in this framework

Implemented training programs raise awareness of unconscious bias and build commitment to implementing policies and procedures that ensure gender equality and diversity

Gender equality and D&I is an ingrained part of corporate culture and institutionalized in all programs and activities

TABLE 11. POLICIES AND GRIEVANCE MANAGEMENT

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

accountable for achieving these goals over a defined timeframe

AVAILABLE RESOURCES AND TOOLS

Guide: Integrating Gender into Workplace Policies (USAID)

Guide: Setting Strategic Gender Equality Targets (USAID)

Guide: Guidelines for Employment Equality Policies in Enterprises (Irish Human Rights and Equality Commission)

Tool: Sample EEO Policy (Employment Law Information Network)

Example: TATA Power-DDL Equal Opportunity Policy (TATA Power-DDL)

Example: Equal Employment Opportunity Reaffirmation Statement (Capital One Financial Corporation)

Report/Study (incl. Case Studies): Gender Diversity Journey: Company Good Practices (ILO)

POLICIES

Create and adopt an antidiscrimination policy that protects employees with all diverse identities Implement an effective anti-discrimination policy that prohibits discrimination across all aspects of the employee life cycle.

Provide well-defined procedures that prohibit any distinction or exclusion made on the basis of sex, gender, gender identity or expression, ethnicity, race, color, religion, political opinion, national or social origin, pregnancy, sexual orientation, marital status, age, genetic information, military status, disability, or any other relevant social characteristic based on the cultural or country context

Listen to and prioritize the voices and opinions of women and other minority groups within the organization to understand what types of discrimination they experience

Educate employees on what types of actions are considered discrimination based on the different social identities of employees in the organization

Identify who is responsible for implementation and indicators for monitoring procedures

Social identities such as sexual orientation might be taboo to discuss in some cultures

Social fissures or tensions between groups based on the cultural or country context might be difficult to talk about or taboo to discuss

Discrimination can be subjective, and employees accused of violating the policy might deny any wrongdoing; However, it is important to remember that the impact on the person who experiences discrimination is more important than the intent of the wrongdoer

Discussions around discrimination might create a tense or uncomfortable work environment initially, especially if topics like this are not discussed regularly in the cultural or country context

There might be resistance or denial among individuals who are not part of a minority group

Employees who experience discrimination feel protected and prioritized within the organization

Employees who are not part of a minority group have an improved understanding of what constitutes discrimination and are actively seeking ways to foster inclusion rather than discrimination

Issues of discrimination are regularly discussed with a proactive attitude and approach to furthering inclusion

Violations of the policy are addressed with appropriate levels of discipline based on the act of discrimination

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
	Demonstrate a clear commitment to anti-discrimination and inclusive goals with a supportive strategy and action plan for implementation		
	Implement training programs to raise awareness of unconscious bias, microaggressions, and other discriminatory behavior		
	Build commitment to implementing the policy among all employees		
	Ensure accountability for implementation with senior leadership		
AVAILABLE RESOURCE	S AND TOOLS

Tool: Racism: It Stops with Me (Australian Human Rights Commission)

Article: 5 Ways Racism is Bad for Business – and What We Can Do About It (WEF)

Article: Building an Anti-Racist Workplace (Times Up Foundation)

POLICIES Adopt a salary equity policy with	Ensure salary equity policy explicitly addresses the following areas:	Funds may not be available to close identified pay gaps	Company adopts and enforces salary equity
mechanisms for analysis and redress	 Salary discrimination within a job category. For example, "Engineer I": A male and a female both with master's degrees in engineering and 5 years' experience being paid differently Salary discrimination between job categories, such as having two job titles, "Office Manager" and "Field Office Manager," with the same responsibilities, but "Office Manager" is paid less and held mostly by women or people from traditionally socially excluded groups 	Union contracts may require amendment during upcoming contract negotiation cycle There is a perception of bias by groups whose salary is unchanged Potential legal action is taken by the group previously paid less	Company closes salary gaps in both areas Men and women with diverse social identities are paid equitably

TABLE 11. POLICIES AND GRIEVANCE MANAGEMENT

PRACTICE DESCRIPTION OF PRACTICE

CHALLENGES TO IMPLEMENTATION

WHAT SUCCESS LOOKS LIKE

 In the hiring and promotions processes, do not ask or use prior salary to determine current salary

AVAILABLE RESOURCES AND TOOLS

Guide: Integrating Gender into Workplace Policies (USAID)

Report/Study: A Comparative Analysis of Promoting Pay Equity: Models and Impacts (ILO)

Report/Study: Pay Equity: A Key Driver of Gender Equality (ILO)

POLICIES

Establish policies to promote reconciliation of work life and family life

Identify needs of staff for better reconciliation of work life and family life and adopt international good practice

Implement global best practices that are aligned with the national legal framework and local culture and support corporate culture change:

- Flexible work schedule
- Work from home and home office, including telework options
- Shorter workday for returning parents
- Longer lunch break for baby feeding/ breast pumping
- Return to work programs offering catch-up training on topics to enable competitiveness for job promotions
- Provision of facilities such as lactation rooms, on-site childcare, and family lunch options
- Support for external childcare (See Benefits best practices on childcare)
- Employee Assistance Program providing support for new parents and for better reconciliation of work life and family life (See Benefits best practices on EAP)
- Job-sharing for female talents and leaders (see Talent and Leadership best practice on job sharing)

Local employment laws may prohibit some options

Individual work units may have set hours, where flexible hours may create staffing difficulties

Field offices may not have the physical space to provide a lactation room or childcare facilities

Telework requires reliable internet, which is not always available

Some positions are staffed 24/7 and/or are on call for emergencies.

Managers may lack experience and be reluctant to grant flexible working or work from home options

Senior management and board must be willing to adopt practices beyond national legislation (e.g., granting paternity leave may not be a legal obligation)

Provided options are well known and perceived as positive contribution of the company to generate better reconciliation of work life and family life

Image of working parents increased as can be seen through promotions and assignment of challenging tasks to women

(and men) with childcare duties

Employees report in satisfaction or
engagement surveys that they perceive
leave policies as fair to all employees

Mothers feel comfortable making use of lactation rooms

Parents are using provided or supported childcare facilities and are satisfied with the quality

 Online training in addition to in-class training, which might be difficult to attend Company benefits extended to 	
 family members Cooperation with high quality schools and financial support for tuition fees 	
Create and implement processes to maintain full staffing while reintegrating the returning employee

POLICIES

Provide sufficient paternity leave 121 even if it exceeds the legal requirements, ideally equal in length to maternity leave

Provide paternity leave that is equal in length to maternity leave even if it exceeds in-country legal requirements for paternity leave; when this is equal, women face less discrimination in hiring and promotion, and men are able to enjoy their role as fathers and caregivers while enjoying better work/life balance

Encourage fathers to take their full paternity leave benefits to foster a workplace culture that does not stigmatize men for assuming a childcare role in the home

Educate employees about the benefits of paternity leave for men, their families, and the company as a whole through campaigns, active communication, counseling for expecting fathers

Provide paternity leave regardless of marital status, sexual orientation, or any other discriminating factor, including equal leave for fathers who adopt

Implement additional leave or options to close the gap identified by the company's benefits analysis

Culture may discourage fathers from taking paternity leave

There may exist legal/regulatory hurdles regarding paternity leave

Company culture may discourage men from taking full parental leave, particularly for men in leadership positions

Men may not want to fully take advantage of paternity or parental leave provisions that would enable less care responsibilities for women

There might be discrimination or stigma against providing leave to unmarried employees or same-sex couples.

Business unit is short-staffed and remaining employees must pick up extra duties (which may result in resentment)

Company funds may not be available to pay for the additional leave or extra hours by other employees The company provides clear guidance to managers/supervisors to manage the preparation of an expected leave and reentering of the man after his leave

Men's careers are not penalized or stunted when they use their full maternity leave benefits

Managers/supervisors know it is their responsibility to manage the process and to provide a supportive environment for fathers, who want to take an active role

Fathers use available parental leave with full pay and other benefits

Fathers are encouraged to take their full paternity leave and there is no stigma associated with using these benefits

Business units are supported through such programs as job sharing, hiring temporary workers and cross-functional training to maintain full staffing while employees take leave

Employees are more satisfied with better work-life balance and concern with their personal needs, resulting in improved retention and quality or output of work

¹²¹ PATERNITY LEAVE. A benefit designed to provide fathers of newborn children with paid or unpaid time off from work following the birth of the child. Some companies grant a limited number of days in case of adoption of a child. (Source: Society for Human Resource Management, Glossary of Human Resources Management Terms)

POLICIES

Develop workplace policies to prevent and respond to domestic violence

Develop an understanding of intimate partner violence and how it impacts employees and the organization; survivors of violence often experience post-traumatic stress, anxiety and sleep Sensitive topic that requires trust and good management to be tackled in a productive and respectful manner, especially when regional and cultural context condones or normalizes domestic violence

Managers and co-workers are sensitized to recognize signs of domestic violence experienced by colleagues

Support programs are used by survivors of domestic violence

PRACTICE

DESCRIPTION OF PRACTICE

neir Tend

WHAT SUCCESS LOOKS LIKE

disorders, which negatively impact their ability to focus at work

Train managers and employees to recognize signs of violence and respond appropriately

Demonstrate leadership commitment to ending domestic violence and dedicate appropriate financial and human resources

Upskill HR staff with training on taking a survivor-centered approach to handle disclosure of violence, including sexual harassment, GBV, and domestic violence

Share resources with all employees, such as a hotline number, contact information for local shelters or support organizations, digital tools, and information on creating an individual safety plan

Provide leave options for employees who are experiencing domestic violence and need to find new housing, seek medical care or counseling, or obtain any other related services

Train male and female employees about prevention of domestic violence (e.g., recognizing what it is and impacts, how to prevent, anger management)

Create and implement workplace policies to prevent and respond to domestic violence and monitor/evaluate the impact of the workplace response

Tendencies to trivialize the topic, including jokes about violence within the family, as well as a mindset supporting a reversal of perpetrator and victim, may counteract efforts and create a harmful environment for those who share their experiences

CHALLENGES TO IMPLEMENTATION

Ill-informed managers and staff without appropriate training may see domestic violence as out of scope for the company and perceive it as a personal issue neglecting the influence it may have on work productivity

Survivors of domestic violence may have diminished self-esteem and/or may be reluctant to share their experiences out of fear of stigmatization.

Perpetrators or potential perpetrators of violence understand the harmful impacts of violence and adopt healthier anger management techniques

GRIEVANCE MANAGEMENT

Implement a fair and respectful process and mechanisms for reporting and handling violations of policies

Institute a fair and transparent investigation and resolution process that creates an open environment to address complaints without fear of associated stigma or retribution

Provide training for employees on compliance with anti-harassment, -abuse and -discrimination policies

Use Employee Resource Groups to support employees who have filed complaints

Include key elements such as:

- Definitions and examples of unwanted or prohibited behaviors
- Description of reporting procedure that includes multiple reporting channels
- Description of the responsibilities of employees, managers, supervisors, and key stakeholders

Complaint mechanisms handle sensitive topics and situations, and it may be difficult for victims to feel comfortable reporting

Company may not be ready to offer different grievance channels to ensure trust in confidentiality

Employees may fear retaliation from an internal company process

It may be required to define different complaint mechanisms for different policies Companies fully implement a complaint process that all employees feel comfortable using

Grievance management mechanisms are used, and complaints are handled within a reasonable timeframe

Complainants report that the grievance was managed satisfactorily, and they have trust in the process

Company provides training to all employees and specialized training for managers that complements and helps reinforce corporate policies against discrimination, harassment, or abuse

Complaints are registered

Company recognizes that the absence of any complaints indicates that there is continued distrust of the reporting and resolution processes or mechanisms

Individuals involved in the reporting and investigative process have a proper

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE
	 Description of the investigation process Description of confidentiality expectations Prohibition of and punishment of retaliation Description of appropriate discipline for employee found to be in violation 		understanding of trauma and how it affects individuals differently, and therefore understand how to best support victims.
	Ensure that various modalities for reporting problems are widely available and communicated throughout company		
	Assign most trusted unit or method to handle complaints		
	Train personnel on investigative techniques (if not outsourced) and procedures with a particular emphasis on trauma-informed care.		
	Monitor complaints and resolution handling to further improve processes		
	Implement a sound "Whistle-blower Policy" to protect those who report

Article: Diversity and Inclusion: A Case for Communication (LinkedIn)

CORPORATE COMMUNICATION

Showcase talented female employees with diverse social identities and their professional achievements

Use internal and external communication channels to elevate the profiles of talented female employees and individuals with diverse social identities, especially women in management functions or in roles typically occupied by men

Use a variety of tools, such as videos, blog posts, and testimonials from female employees on the organization's career page. Post stories that feature female employees on company social media channels. Introduce a section in the corporate newsletter to recognize female talent and create other internal opportunities to recognize and honor women who have successfully pushed boundaries (e.g., "Wonder Woman of the Week")

Create more visibility for women and members of other marginalized or minority groups. Provide speaking opportunities for them in stakeholder meetings, introduce them internally and in public fora, media campaigns, and in Women and individuals with diverse social identities may be hesitant to be featured

Company may need to invest in speaking skills of role models for public events, media campaigns and conferences

Female and male employees with diverse social identities feel valued and empowered through stories about them and their work

Female role models gain exposure to external stakeholders and opportunities to exchange at conferences, national and international fora, which can also support their growth

Male employees have increasingly positive views of women's professional skills and abilities

Company increases image of being an inclusive workplace by showcasing successful women with diverse social identities

TABLE 12. CORPORATE COMMUNICATIONS AND BRANDING **PRACTICE** DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE outreach programs to schools or other educational institutions Provide women and individuals with diverse backgrounds who are role models opportunities to speak at conferences and high-level meetings such as national or international stakeholder groups and industry networks **AVAILABLE RESOURCES AND TOOLS Example:** Introducing First Ever Women Meter Readers (K-Electric) Video: Women of WILL: Watch the Success Story of Shweta, a Female Technician (TATA Power-DDL) Video: Women of WILL: Watch the Success Story of Raini, a Senior Technician (TATA Power-DDL) Video: First Ever Women Meter Readers in KE's Field Workforce (K-Electric) Video: HER SAY: Lilian Ngene Works on Live Power Lines (Kenya CitizenTV)

Article: Social Media for Social Good: Raising Awareness of Jordan's Water Crisis (Medium) **CORPORATE** COMMUNICATION

Create informal communication opportunities to discuss gender equality-related topics

Host events, discussions, or other activities to informally discuss gender equality in the workplace.

Article: "It's Not About Muscles" - Grace Karuiru on How She Has Defied Odds to Excel in Engineering (The Star)

Article: This Company Encourages Female Employees To Brag About Each Other (FastCompany)

Create an environment where employees can freely discuss gender equality in a comfortable and open way without the pressure of a formal event.

Use a variety of ways to engage employees in a fun and meaningful way (e.g., film screenings, book clubs, discussion groups, games, etc.)

Limited financial and human resources might deprioritize events or activities that are not business critical

Employees might not attend optional events

Informal communications opportunities are used regularly to engage employees and discuss gender equality in an informal and unintimidating way

Employees regularly attend and participate in the scheduled events or activities

TABLE 12. CORPORATE COMMUNICATIONS AND BRANDING DESCRIPTION OF PRACTICE **PRACTICE** CORPORATE COMMUNICATION

Develop and implement a social and behavior change communications (SBCC) strategy and plans to support the change management process, build support, and counter resistance.

Identify which members of your

communications, marketing, public affairs, or other teams will be dedicated to developing and implementing the SBCC strategy.

Conduct stakeholder mapping to identify and prioritize key internal and external stakeholders

For target groups, conduct a KAP analysis (knowledge, attitudes, and practices) to understand barriers to and motivations for change. This can be done through focus groups and key informant interviews

With a clear understanding of the problem, develop goals, objectives and set targets for what should be achieved with an SBCC strategy

Define the strategy or approach and key interventions

Disseminate key messages based upon a holistic understanding of the target audience

Develop communications tools (written or mass/social/multi-media) and pre-test them with small groups

Implement SBCC plans, monitor change over time, and adapt/adjust as needed

CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

Engrained cultural norms and gender stereotypes that inhibit change might exist in the organization

Maintaining motivation of the communications team throughout the change process might be difficult

Reaching underrepresented groups, such as groups that speak local languages or dialects, might be challenging

Noisy detractors who discredit or undermine the effort might exist

There might be a lack of active support (passive or neutral/silent support), especially from critical stakeholders

SBCC plans are directly aligned with the gender equality goals and targets set by

the organization and support their achievement

KAP data are effectively utilized to develop and deliver effective, transformative messages to key stakeholders

Target audiences receive messages, understand, and are influenced by them

Measurable changes in knowledge, attitudes, and practices are discernible over time, and can be attributed to the SBCC strategy

A tipping point is reached, whereby the communications have reached enough people with enough frequency, and barriers to making meaningful change are unlocked

CORPORATE BRANDING

Showcase the company as having an equitable and inclusive culture, highlighting initiatives that support gender equality and D&I

Strategic importance of corporate branding may be underestimated

Setting up an employer branding strategy demands time and effort, which may be

General public image of the company as employer of choice for women and men with diverse social identities is increased

TABLE 12. CORPORATE COMMUNICA	TABLE 12. CORPORATE COMMUNICATIONS AND BRANDING					
PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	What success looks like			
Build a successful employer brand ¹²³ that is attractive to female candidates and individuals with diverse social identities	Communicate about the equitable corporate brand, placing women employees with diverse social identities in brand ambassador/ spokesperson positions to enhance credibility	challenging to prioritize in a resource- constrained environment Results of a successful corporate	Current female and male employees involved in the employer branding process			
		branding strategy do not show immediately and may require patience to sustain efforts while waiting for longer term results	Credibility is increased and more diverse female talent is accessed			
	Create a website that clearly communicates gender equality and D&I as a company value and provide examples on how the company acts on these values		Female candidates and individuals with diverse social identities increasingly apply for positions at the company because they are convinced that gender equality and D&I is part of the company's values, mission, vision, and culture			
	Create a profile on various job and recruiting websites to openly state why gender equality and D&I are important to your company, disclosing targets and/or strategies on gender equality and D&I (in addition to the company website or career page)		Family and friends of female talents are supportive of them working at the company due to increased perception as good employer for women			
	Be present at regional job fairs, career days at universities, etc. to attract talent					
	Use creative gender-responsive approaches and messages to communicate your brand and engage current and potential employees (e.g., storytelling, videos, etc.)					
	Ensure female and male employees with diverse social identities are provided with equal opportunities to represent the company at public fora					

EMPLOYER BRAND. Describes a company's reputation and popularity from a potential employer's perspective and describes the values a company gives to its employees. (Source: <u>TalentLyft</u>, <u>What is Employer Brand?</u>)

TABLE 12. CORPORATE COMMUNICATIONS AND BRANDING

PRACTICE DESCRIPTION OF PRACTICE CHALLENGES TO IMPLEMENTATION WHAT SUCCESS LOOKS LIKE

AVAILABLE RESOURCES AND TOOLS

Report/Study: Diversity and Inclusion Needs to Be More Than a Brand Message to Impact Talent Attraction (ADP)

Video: GE #BalanceTheEquation Campaign: "What If Scientists Were Celebrities?" (General Electric, GE)

CORPORATE BRANDING

Showcase company commitment to gender equality, diversity, and inclusion through membership in relevant networks, associations, and conferences

Screen membership opportunities that have good recognition in the regional and international context

Seek membership status in relevant networks and associations focusing on gender equality and D&I

Communicate or report on a regular basis on related activities and achievements

Join conferences/working groups on gender equality and D&I to show commitment and to learn from other companies, be aware of best practices, and network International networks and associations may not be well-known in the country

National networks and associations may not exist or may have bad reputations

Company may lack resources to track membership opportunities

Joining conferences/working groups may come with financial expenses, such as conference fees, travel, and related costs Membership opportunities and associations are screened and benchmarked for creating high impact

Company is member of the most relevant and well-perceived networks and associations

Memberships and achievements are highlighted through company communication

Improved knowledge gained through conferences and working groups, including insight on the latest developments in the field

AVAILABLE RESOURCES AND TOOLS

Example: UN Global Compact (UNGC)

CORPORATE BRANDING

Showcase company commitment through adoption of international standards and participation in rankings or awards on gender equality, diversity, and inclusion

Dedicate resources to screen national and international standards, awards, and rankings

Participate in competitions to receive public recognition for commitment toward gender equality and D&I

Track and document promising projects, including documenting through pictures and videos that can be used in submissions

Establish strong relationship with national initiatives so company is informed of opportunities for ad hoc submissions

Participation in awards may require allocation of significant human and financial resources

Lack of national or regional awards and competitions

International organizations may grant awards on an ad hoc basis rather than on a regular basis

Some awards have limited visibility but a high cost to apply

Credibility of awards may be limited
Senior leadership may be reluctant to
endorse international commitments

Company has a list of awards and rankings to participate in, and adequate resources for applying or joining

Company is recognized and rewarded for efforts toward gender equality and D&I in the workplace

Company increasingly gains external recognition through awards and winning competitions

Company increases its rankings

Public awards and rankings for being an employer of choice regarding gender equality and D&I attracts female candidates with diverse social identities

PRACTICE	DESCRIPTION OF PRACTICE	CHALLENGES TO IMPLEMENTATION	WHAT SUCCESS LOOKS LIKE

ANNEX I. GLOSSARY OF GENDER-RELATED TERMS

(Jump back to **Executive Summary**)

These definitions are provided to enable the reader to understand the meaning of the gender terminologies used in this document. These definitions are derived from various sources such as United Nations (UN) agencies, USAID, and other international organizations.

AFFIRMATIVE ACTION: Actions, policies, and procedures undertaken in recruiting, hiring, promotions and all other personnel actions that are designed to achieve equal employment opportunity and eliminate the present effects of past discrimination. Affirmative action requires (I) thorough, systematic efforts to prevent discrimination from occurring or to detect and eliminate it as promptly as possible and (2) recruitment and outreach measures. (Source: The Human Resources Team, Glossary of Equal Opportunity/Affirmative Action Terms)

AFFIRMATIVE ACTION BACKLASH: Backlash is a negative reaction to social or political change. [Can be] driven by the perception that focus on gender equality initiatives and the promotion of women to leadership roles is unfair and not meritocratic. (Source: Male Champions of Change, Backlash & Buy-In)

DISCRIMINATION AGAINST WOMEN AND GIRLS: Discrimination against girls and women means directly or indirectly treating girls and women differently from boys and men in a way which prevents them from enjoying their rights. Discrimination can be direct or indirect. Direct discrimination against girls and women is easier to recognize as the discrimination is quite obvious. For example, in some countries, women cannot legally own property; they are forbidden by law to take certain jobs; or the customs of a community may not permit girls to pursue higher education. Indirect discrimination against girls and women can be difficult to recognize. It refers to situations that may appear to be unbiased but result in unequal treatment of girls and women. For example, a job for a police officer may have minimum height and weight criteria that women may find difficult to fulfill. As a result, women may be unable to become police officers. (Source: UN Women Training Centre, Gender Equality Glossary)

DIVERSITY, EQUITY, INCLUSION, AND ACCESSIBILITY (DEIA): Diversity refers to the practice of including the many communities, identities, races, ethnicities, backgrounds, abilities, cultures, and beliefs of people, including underserved communities. Equity means the consistent and systematic fair, just, and impartial treatment of all individuals, including individuals who belong to underserved communities that have been denied such treatment. Inclusion means the recognition, appreciation, and use of the talents and skills of employees of all backgrounds. Accessibility refers to providing accommodations and modifications to ensure equal access for persons with disabilities (Source: White House 2021).

DIVERSITY HIRING: Hiring based on merit with special care taken to ensure procedures are free from biases related to a candidate's age, race, gender, religion, sexual orientation, and other personal characteristics that are unrelated to their job performance. (Source: Ideal, Diversity Hiring)

DIVERSITY HIRING AUDIT: An audit used to assess the diversity of the hiring process and to identify any potential bottlenecks and discrepancies (e.g., Is it a top-of-the-funnel issue? Or is it a leakingpipeline issue? See source). (Source: Ideal, Diversity Hiring)

EQUAL EMPLOYMENT OPPORTUNITY (EEO): A policy statement that prohibits discrimination and harassment of any type and affords equal employment opportunities to employees and applicants without regard to race, color, religion, sex, age, pregnancy, national origin, disability status, protected veteran status, or any other characteristic protected by law. (Source: HR.com, Glossary of Human Resources (HR) and Employee Benefit Terms)

GENDER: Refers to a socially constructed set of roles, norms, rights, responsibilities, entitlements, expectations, and behaviors associated with women, men, and individuals of diverse gender identities, as well as the relationships between and among them. These social definitions differ among and within cultures, change over time, and often intersect with other factors such as age, class, disability, ethnicity, race, religion, and sexual orientation. All individuals are subject to these expectations and sanctions, including transgender and gender non-binary individuals. The term gender should not be used interchangeably with women, sex, or gender identity. (Source: USAID Collective Action to Reduce Gender-Based Violence (CARE-GBV) Foundational Elements for Gender-Based Violence Programming in Development Glossary)

GENDER ANALYSIS: A critical examination of how differences in gender roles, activities, needs, opportunities, and rights/entitlements affect men, women, girls and boys in certain situations or contexts. Gender analysis examines the relationships between females and males and their access to and control of resources and the constraints they face relative to each other. (Source: UN Women Training Centre, Gender Equality Glossary, USAID Gender Analyses Portal)

GENDER AUDIT: A tool to promote organizational learning at the individual, work unit and organizational levels on how to practically and effectively mainstream gender. It considers whether internal practices and related support systems for gender mainstreaming are effective and reinforce each other and whether they are being followed. It establishes a baseline; identifies critical gaps and challenges; and recommends ways of addressing them, suggesting improvements and innovations. It monitors and assesses the relative progress made in gender mainstreaming and helps to build organizational ownership for gender equality initiatives and sharpens organizational learning on gender. (Source: UN Women Training Centre, Gender Equality Glossary)

GENDER AWARENESS RAISING: Process that aims at showing how existing values and norms influence our picture of reality, perpetuate stereotypes and support mechanisms (re)producing inequality. (Source: European Institute for Gender Equality, Glossary & Thesaurus)

GENDER-BASED VIOLENCE (GBV): Any harmful threat or act directed at an individual or group based on actual or perceived sex, gender, gender identity or expression, sex characteristics, sexual orientation, and/or lack of adherence to varying socially constructed norms around masculinity and femininity. Although individuals of all gender identities may experience gender-based violence, women, girls, and gender non-conforming individuals face a disproportionate risk of gender-based violence across every context due to their unequal status in society. Gender-based violence is characterized by the use or threat of physical, psychological, sexual, economic, legal, political, social, and other forms of control, coercion, and/or violence. It can occur across the life course and is perpetrated by a diverse array of actors, including intimate partners; family members; persons in positions of power, authority, or trust; friends; acquaintances; or strangers. (Source: United States Strategy to Prevent and Respond to Gender-Based Violence Globally: 2022 Update).

GENDER BIAS: Making decisions based on gender that result in favoring one gender over the other which often results in contexts that are favoring men and/or boys over women and/or girls. (Source: **UNICEF, Glossary of Terms and Concepts**)

GENDER BLINDNESS: Failure to recognize that the roles and responsibilities of men/boys and women/girls are assigned to them in specific social, cultural, economic, and political contexts and backgrounds. Projects, programs, policies, and attitudes which are gender blind do not consider these different roles and diverse needs. They maintain the status quo and will not help transform the unequal structure of gender relations. (Source: UN Women Training Centre, Gender Equality Glossary)

GENDER EQUALITY: Equal enjoyment of human rights, socially valued goods, opportunities, and resources by all individuals independent of a person's sex or gender identity. Gender equality means more than parity in numbers or laws on the books; it means equal access and freedoms for all people and that rights, responsibilities, and opportunities will not depend on an individual's sex assigned at birth or their gender identity. Gender equality is fundamental in human development for all women and girls, men and boys, and individuals of other gender identities. It is both a human rights issue and a precondition for, and indicator of, sustainable development. (Source: USAID CARE-GBV Foundational Elements for Gender-Based Violence Programming in Development Glossary)

GENDER EQUITY: The process of reaching equality. The process of being fair to women and men, boys and girls. To ensure fairness, equity measures or interventions must be taken to compensate for cumulative economic, social, and political disadvantages that prevent women and men, boys and girls from operating on a level playing field. (Source: Interagency Gender Working Group, Gender-related Terms and Definitions)

GENDER EXPRESSION: How a person presents their gender identity outwardly, through acts, dress, behavior, voice, or other perceived characteristics. Gender expression can be described variously as feminine, masculine, both, or neither. Pronouns are also part of how people express and articulate gender identity.

GENDER GAP: Any disparity between women and men's condition or position in society. It is often used to refer to a difference in average earnings between women and men, e.g., "gender pay gap." However, gender gaps can be found in many areas, such as the four pillars that the World Economic Forum uses to calculate its Gender Gap Index, namely: economic participation and opportunity, educational attainment, health and survival, and political empowerment. (Source: UN Women Training Centre, Gender Equality Glossary)

GENDER IDENTITY: A person's deeply held sense of self. It is how individuals perceive themselves and what they call themselves. This can include identifying as woman or man, or as a gender diverse individual along the spectrum of gender identity and gender expression. While gender is a social construct ascribed to individuals, gender identity is self-determined. A person's gender identity may or may not align with their biological sex assigned at birth. When someone's sex assigned at birth aligns with their gender identity, the person is cisgender. When someone's sex assigned at birth does not align with their gender identity, the person may identify as a transgender man, transgender woman, nonbinary, or another identity (e.g., gender nonconforming, agender, etc.).

GENDER MAINSTREAMING: Process of incorporating a gender perspective into organizational policies, strategies, and administrative functions, as well as into the institutional culture of an organization. This process at the organizational level ideally results in meaningful gender integration. (Source: Interagency Gender Working Group, Gender-related Terms and Definitions) The primary objective behind gender mainstreaming is to design and implement development projects, programs, and policies that are gender-neutral, gender sensitive, and gender positive/ transformative. (Source: UN Women Training Centre, Gender Equality Glossary)

GENDER NEUTRAL: Policy, program or situation that has no differential positive or negative impact in terms of gender relations or equality between women and men. (Source: European Institute for Gender Equality, Glossary & Thesaurus). Do not reinforce existing gender inequalities. (Source: UN Women Training Centre, Gender Equality Glossary)

GENDER NORMS: A gender norm is a type of social norm. Among the characteristics of gender norms is the strong role of power in maintaining norms that normalize inequality between women, men, and gender-nonconforming people (Source: USAID 2021, Kedia and Verma 2019).

GENDER PARITY: Term for equal representation of women and men in a given area, for example, gender parity in organizational leadership or higher education. Working toward gender parity (equal representation) is a key part of achieving gender equality, and one of the twin strategies, alongside gender mainstreaming, (Source: UN Women Training Centre, Gender Equality Glossary)

GENDER PAY GAP: Measurable indicator of inequality and it captures the difference in pay between men and women. Most governments have legislated to guarantee equality of treatment between men and women in remuneration. The ILO Equal Remuneration Convention, 1951 (No. 100) is one of the most highly ratified conventions. Yet, the gender pay gap persists and the World Economic Forum estimates it will take 202 years to close the global gender pay gap, based on the trend observed over the past 12 years. (Source: International Labour Organization, Understanding the Gender Pay Gap)

GENDER PERSPECTIVE / "GENDER LENS": Focus that brings a framework of analysis to assess how women and men affect and are affected differently by policies, programs, projects and activities. It enables recognition that relationships between women and men can vary depending on the context. A gender perspective considers gender roles, social and economic relationships and needs, access to resources, and other constraints and opportunities imposed by society or culture, age, religion, and/or ethnicity on both women and men. (Source: UN Women & United Nations Global Compact, Women's **Empowerment Principles**)

GENDER-RESPONSIVE BUDGETING: The goal of gender-responsive budgeting (GRB) initiatives is to promote equality between women and men by influencing the budgeting process. Collectively, GRB initiatives seek to raise awareness of the effects that budgets have on women and men and hold governments [and companies] accountable for their commitments to gender equality. GRB is budgeting that incorporates a gender equality perspective into the budgeting process and the policies that underpin it promote equality between women and men. (Source: International Labour Organization, Overview of Gender-responsive Budget Initiatives)

GENDER SENSITIVE: Policies and programs that consider the particularities pertaining to the lives of both women and men, while aiming to eliminate inequalities and promote gender equality, including an equal distribution of resources, therefore addressing and taking into account the gender dimension. (Source: European Institute for Gender Equality, Glossary & Thesaurus). Attempts to redress existing gender inequalities. (Source: UN Women Training Centre, Gender Equality Glossary)

GENDER-SENSITIVE INDICATOR: An indicator is a pointer. It can be a measurement, a number, a fact, an opinion, or a perception that focuses on a specific condition or situation, and measures changes in that condition or situation over time. The difference between an indicator and a statistic is that indicators should involve comparison with a norm. Gender-sensitive indicators measure genderrelated changes in society over time; they provide a close look at the results of targeted gender-based initiatives and actions. (Source: UN Women & United Nations Global Compact, Women's **Empowerment Principles**)

GENDER STEREOTYPES: Simplistic generalizations about the gender attributes, differences and roles of women and men. Stereotypical characteristics about men are that they are competitive, acquisitive, autonomous, independent, confrontational, concerned about private goods. Parallel stereotypes of women hold that they are cooperative, nurturing, caring, connecting, group-oriented, concerned about public goods. Stereotypes are often used to justify gender discrimination more broadly and can be reflected and reinforced by traditional and modern theories, laws, and institutional practices. (Source: UN Women Training Centre, Gender Equality Glossary)

GLASS CEILING: Metaphor that has often been used to describe invisible barriers ("glass") through which women can see elite positions, for example in government or the private sector, but cannot reach them (coming up against the invisible "ceiling"). These barriers prevent large numbers of women and ethnic minorities from obtaining and securing the most powerful, prestigious, and highest-paying jobs in the workforce. (Source: UN Women Training Centre, Gender Equality Glossary)

GENDER TRANSFORMATIVE: A gender-transformative approach "seeks to fundamentally transform relations, structures, and systems that sustain and perpetuate gender inequality. This approach requires: (1) critically examining gender roles, norms, power dynamics, and inequalities, (2) recognizing and strengthening positive norms that support gender equality and an enabling environment, and (3) transforming underlying power dynamics, social structures, policies and broadly held social norms that affect women and girls, men and boys, and individuals of other gender identities and perpetuate gender inequalities. This approach recognizes that gender equality cannot be achieved or sustained without an approach that includes all three of these components."

INTERSECTIONALITY: The concept of intersectionality recognizes that all individuals have multiple social identities shaping their lived experiences, including but not limited to their place in society, privileges they may or may not enjoy, the level and types of protection from human rights violations, and the impact of complex forms of discrimination. Although intersectionality acknowledges that singular oppressions exist, it identifies those overlapping identities (age, class, disability, gender identity, nationality, race, sex, sexual orientation, etc.) interact with overlapping systems of oppression and/or discrimination and the need to address the impact these have on systemic privilege and access"

MASCULINITY: Social meaning of manhood, which is constructed and defined socially, historically and politically, rather than being biologically driven. There are many socially constructed definitions for being a man and these can change over time and from place to place. The term relates to perceived notions and ideals about how men should or are expected to behave in a given setting. Masculinities are not just about men; women may perform and produce the meaning and practices of the masculine as well. (Source: UN Women Training Centre, Gender Equality Glossary)

MEN'S ENGAGEMENT: Programmatic approach that involves men and boys: a. as clients and beneficiaries, b. as partners; and c. as agents of change in actively promoting gender equality, women's empowerment, and the transformation of inequitable definitions of masculinity. Male engagement also includes broader efforts to promote equality with respect to caregiving, fatherhood, and division of labor, and ending gender-based violence. (Source: Interagency Gender Working Group, Gender-related Terms and Definitions)

OCCUPATIONAL SEGREGATION: Occurs when one demographic group is overrepresented or underrepresented among different kinds of work or different types of jobs. The International Labour Organization states that "sectoral and occupational segregation may be viewed as a cycle: as women and men are confined to certain occupations, stereotypes are strengthened regarding women's and men's

aspirations, preferences and capabilities. In turn, this affects both the perceptions of employers about women's and men's skills and attitudes and the aspirations of individual workers. Thus, women and men are likely to continue pursuing careers in sectors and occupations that are considered "feminine" and "masculine" and are discouraged to do otherwise." (Source: Washington Center for Equitable Growth, Factsheet & International Labour Organization, Women at Work: Trends 2016)

PATRIARCHY: Traditional form of organizing society which often lies at the root of gender inequality. According to this kind of social system, men, or what is considered masculine, is accorded more importance than women, or what is considered feminine. Traditionally, societies have been organized in such a way that property, residence, and descent, as well as decision-making regarding most areas of life, have been the domain of men. This is often based on appeals to biological reasoning (women are more naturally suited to be caregivers, for example) and continues to underlie many kinds of gender discrimination. (Source: UN Women Training Centre, Gender Equality Glossary)

SEX: The designation of a person as male, female, or intersex based on a cluster of anatomical and physiological traits known as sex characteristics. Sex characteristics include external genitalia, secondary sex characteristics (e.g., facial hair, distribution of fat tissue, voice pitch), gonads and internal organs, hormones, and chromosomes. At birth, infants are typically assigned a sex based on visual inspection of external genitalia.

SEX-DISAGGREGATED DATA: Data that are cross classified by sex, presenting information separately for men and women. When data are not disaggregated by sex, it is more difficult to identify real and potential inequalities. Sex-disaggregated data are necessary for effective gender analysis. (Source: UN Women Training Centre, Gender Equality Glossary)

SEXUAL HARASSMENT: Any unwelcome sexual advances, requests for sexual favors, verbal or physical conduct or gestures of a sexual nature, or any other behavior of a sexual nature that might cause offense or humiliation to another. It comprises sexual or sex-based conduct that interferes with an individual's work performance; creates an intimidating, hostile, or abusive work environment; or affects the terms and conditions of employment. While typically involving a pattern of behavior, it can take the form of a single incident. Additionally, it can encompass sex- and gender-based discrimination, disrespect, and aggression rooted in the abuse of power. Sexual harassment may occur between people of any gender identity (United Nations Secretariat 2008, U.S. Department of State 2019, Berdahl 2007).

SOCIAL INCLUSION: The process of improving the ability, opportunity, and dignity of people disadvantaged on the basis of their identity to take part in society. (Source: World Bank, Inclusion Matters)

SEXUAL ORIENTATION: The enduring physical, romantic, and/or emotional attraction to other people by sex or gender identity. Common sexual orientations include straight or heterosexual, gay or lesbian, bisexual, pansexual, asexual, queer, and questioning. Sexual orientation is separate from gender identity or gender expression.

TOKENISM: Policy or practice that is symbolic and involves attempting to fulfil one's obligations with regard to established targets, such as voluntary or mandated gender quotas, with limited efforts or gestures, especially toward minority groups and women, in ways that will not change men-dominated power and/or organizational arrangements. (European Institute for Gender Equality, Glossary & Thesaurus)

UNCONSCIOUS GENDER BIAS: Unintentional and automatic mental associations based on gender, stemming from traditions, norms, values, culture and/or experience. Automatic associations feed into decision-making, enabling a quick assessment of an individual according to gender and gender stereotypes. Unconscious gender bias remains a significant barrier to women's career advancement. (Source: ILO, Breaking Barriers: Unconscious Gender Bias in the Workplace)

WOMEN'S EMPOWERMENT: When women and girls in all their diversity act freely, claim and exercise their rights, and fulfill their potential as full and equal members of society. All individuals have power within themselves; however, cultures, societies, and institutions create conditions that facilitate or undermine the possibilities for empowerment.

ANNEX II. BEST PRACTICE SCORES

Engendering Industries has scored each best practice on a scale of I to 3 based on the potential level of impact. This benchmarking of best practices is meant to be a tool for organizations and coaches to identify areas where additional gender equity practices could be considered for implementation. It is recommended that organizations work with an experienced change management coach to decide on what interventions might be most impactful or feasible within the context of an organization. In some cases, a best practice with a score of I might make more sense for a particular organization than a best practice with a score of 3.

This annex is not intended to raise expectations that each organization will work toward implementing every best practice outlined. Rather, it is meant to be an assessment and learning tool to guide coaching discussions to support organizations in discovering the most strategic areas for improving gender equity and equality.

WEIGHTING OF GENDER EQUITY BEST PRACTICES SCORES

There are a range of best practice types, some simple and some more complex to implement, and others that support the path toward gender equality, while others are highly transformative when implemented well. As such, the best practices are weighted in scoring depending on the potential level of impact when implemented well. Each practice is weighted based on adaptation of the Infrastructure and Cities for Economic Development (ICED) Gender and Inclusion (G&I) Framework: 124

- Minimum Compliance: (I point) Practices that meet basic needs and vulnerabilities of women and marginalized groups/minimum national and international standards
- Empowerment: (2 points) Practices that build assets, capabilities, and opportunities for women and marginalized groups
- Transformation: (3 points) Practices that address unequal power relations and seek institutional and societal change

This annex is intended to provide a methodology that any male-dominated organization may use to selfevaluate themselves based on the best practices recommended by Engendering Industries. Each individual best practice is assigned with an impact level as described above. If an organization reports that it is implementing a best practice, the commensurate points are included in the organization's score, with the possibility of either I, 2, or 3 points per best practice. This is done to provide a more accurate snapshot of the organization's work in implementing gender equity best practices so that, for example, committing to a standard with a signature is not given the same weight as transforming workplace culture. Across all 87 best practices, there is a total possibility of 303 points.

However, it is important to note that this benchmarking score is based on an organization's own self reporting of whether they are implementing a practice or not. Therefore, it does not provide scoring based on the actual impact of the best practice implementation at the organization, or the maturity of the implementation. Rather, it is a benchmark score of the potential for impact depending on the quality of the practice implementation. It is recommended that an organization assess the maturity of its best practice implementation on an ongoing basis with an experienced change management coach.

NO.	BEST PRACTICE	POTENTIAL IMPACT SCORE
	ATTRACTION AND TALENT OUTREACH (9)	20
AT01	Prepare the company to be seen as inclusive for women with diverse social identities	3
AT02	Showcase company as a good place for women with diverse social identities to work	3
AT03	Inspire, motivate, and encourage young girls to study STEM subjects and to strive for a career in STEM industries	2
AT04	Invite girls with diverse social identities to become familiar with the company	2
AT05	Conduct outreach and form high quality, sustainable partnerships with educational institutions that leads to long-term attraction of female job candidates with diverse social identities	2
AT06	Use internship programs to promote technical jobs and the company as an employer of choice for women and men with diverse social identities	2
AT07	Offer scholarships to female students with a focus on STEM subjects	2
AT08	Offer supervision of master thesis or paid master thesis contract with a focus on female students	2
AT09	Use high quality, equitable, and inclusive mentorship programs to promote technical jobs and the company as employer of choice among women and men	2
	RECRUITING AND HIRING (8)	17
RH01	Attract more diverse women candidates through inclusive job ads	2
RH02	Consider targeted hiring to fill open positions and increase overall percentage of women in the company in general and/or in the technical areas	2
RH03	Participate in (university) career fairs and regional job fairs to recruit qualified women with diverse social identities	2
RH04	Apply equitable and inclusive recruitment and hiring practices	3
RH05	Conduct market research to understand barriers and opportunities for women in the labor market	2
RH06	Conduct a diversity hiring audit to determine what is not contributing to gender equality and diversity goals	1
RH07	Use internship programs for direct hiring, with gender parity in intern placements and hiring	2
RH08	Integrate gender equality, parity, and diversity considerations into procurement policies and practices to ensure subcontractor/ supplier alignment with the company's gender equality and diversity goals	3

	ONBOARDING AND TRAINING (11)	25
OT01	Define clear responsibilities for everyone involved in the onboarding process	2
OT02	Communicate company commitment to gender equality, diversity, and inclusion during onboarding	3
OT03	Encourage managers and other employees to integrate and "socialize" new hires for their first year	2
OT04	Develop and implement a "buddy system" for new employees as part of onboarding	2
OT05	Establish system of regular check-ins with new hires in first year of employment	2
OT06	Create standardized training plan with must-have trainings for all employees	2
ОТ07	Create training plan for each employee with a focus on exposure of women to other work areas and duties to achieve skill parity	2
OT08	Develop and conduct gender awareness, anti-discrimination, diversity and inclusion, and unconscious bias trainings	3
ОТ09	Provide company-wide employee and specialized management training on gender equality and diversity strategies, policies, and codes of conduct	3
OTI0	Provide training to all male and female employees and managers on what sexual harassment is, how to prevent it, report it, and respond to it with a survivor-centered approach	2
OTII	Provide leadership and technical skills training to women to prepare them for new roles and responsibilities	2
	PERFORMANCE MANAGEMENT, COMPENSATION AND BENEFITS (8)	20
PMCB01	Design and implement a fair and unbiased employee performance management and appraisal system and process	3
PMCB02	Conduct salary gap analysis to determine if there are gender differences and adjust salaries to close identified gaps	I
PMCB03	Conduct equity and impact analysis of benefits, including usage/uptake of benefits	3
PMCB04	Ensure that benefits — such as medical coverage, tuition reimbursement and retirement savings — are equally accessible to male and female employees	2
PMCB05	Create working conditions that support improved reconciliation of work life and family life for women and men with care duties	3
PMCB06	Institute an inclusive employee health and wellness program to improve the health, well-being, and productivity to support all female and male employees	3
PMCB07	Establish an Employee Assistance Program (EAP) to support the mental and emotional health of female and male employees	3

PMCB08	Review infrastructure gaps to ensure that the workplace has adequate facilities to accommodate women and other diverse social groups	2	
	TALENT AND LEADERSHIP DEVELOPMENT (7)		
TLOI	Assess diverse talent pipeline health by identifying talent and leadership development needs through gap analysis	I	
TL02	Develop structured talent development plan and process to counteract bias and gender parity and diversity imbalances in talent pool	3	
TL03	Develop structured and long-term leadership development plan to include women with diverse social identities at all leadership levels	3	
TL04	Provide mentoring for women with diverse social identities to cultivate their talent and mentoring for men to foster male allies	2	
TL05	Provide sponsorship for women with diverse social identities to make them more visible for promotion	2	
TL06	Introduce job sharing for management functions and other key roles	3	
TL07	Provide on-the-job learning opportunities, such as job shadowing and job rotations, especially for business areas in which women are underrepresented	2	
	RETENTION AND EMPLOYEE ENGAGEMENT (5)	10	
REE01	Use workplace climate and employee satisfaction surveys to identify gender equality and diversity and inclusion challenges	I	
REE02	Devise a targeted strategy to retain top female talent including high-performing women, women in key technical functions, and women demonstrating leadership potential	2	
REE03	Engage senior leadership and staff in gender equality, diversity, and inclusion efforts	3	
REE04	Organize informal talks between the CEO and employees, ensuring inclusion of women with diverse social identities	2	
REE05	Leverage existing women's and diversity networks to support development of good practices	2	
	SUCCESSION PLANNING AND PROMOTION (3)	8	
SPPR01	Establish and implement succession plans that are inclusive of women with diverse social identities	2	
SPPR02	Use skill mapping to support unbiased succession planning and promotion	3	
SPPR03	Develop promotion processes to counteract bias in promotions	3	
	4		
SR01	Address the gender inequality impact of retrenchment	2	

SR02	Ensure both men and women participate in retirement plan and/or financial education programs	2
	CORPORATE CULTURE AND LEADERSHIP (5)	15
CCL01	Develop a business case for gender equality, diversity, and inclusion based on company-specific gender and diversity assessment	3
CCL02	Develop a strategy and change management plan to promote gender equality, diversity, and inclusion throughout the company	3
CCL03	Make gender equality, diversity, and inclusion part of the workplace culture	3
CCL04	Support men's engagement through identification of male change agents and motivating them to act as promoters and ambassadors for gender equality	3
CCL05	Model action that supports gender equality, diversity, and inclusion at leadership levels	3
	POLICIES (15)	135
POI	Adopt and implement a gender equality and social inclusion policy	9
P02	Establish a corporate-level equal employment opportunity (EEO) policy	9
P03	Create and adopt an anti-discrimination policy that protects employees with all diverse identities	9
P04	Adopt a salary equity policy with mechanisms for analysis and redress	9
P05	Establish policies to promote reconciliation of work life and family life	<u>9</u>
P06	Provide maternity leave that meets or exceeds the requirements of national legislation	9
P07	Provide sufficient paternity leave even if it exceeds the legal requirements, ideally equal in length to maternity leave	9
P08	Establish a childcare benefits policy that offers facilities (e.g., crèche or nursery) or provides monetary assistance with childcare arrangements	9
P09	Establish family leave policies meeting the stated needs of parents and employees	9
PIO	Adopt a survivor-centered sexual harassment and gender-based violence (GBV) policy including grievance management	9
PII	Develop workplace policies to prevent and respond to domestic violence	9
PI2	Implement a fair and respectful process and mechanisms for reporting and handling violations of policies	9
PI3	Establish health and safety policy that explicitly and equally considers the needs of women and men	9
PI4	Create and adopt a workplace menstrual health management (MHM) policy to ensure that those who menstruate can manage their MHM needs safely and with dignity while at work	9

PI5	Review and revise all other company policies to support gender equality, diversity, and inclusion goals	9
	COMPANY PERFORMANCE AND REPORTING (6)	14
CPR01	Collect and analyze sex-disaggregated data at the company level and use the data to regularly monitor progress of gender equity interventions	I
CPR02	Dedicate budget and track use of financial resources to increase gender equality and diversity	3
CPR03	Develop and institutionalize targets and/or KPIs for individual managers and departments to support gender equality.	3
CPR04	Disclose gender equality and diversity targets and/or KPIs on gender equality and D&I in publicly available reports and indices	3
CPR05	Adopt international standards and endorse international commitments for gender equality	3
CPR06	Participate in gender equality and diversity awards, rankings, and certification processes	I
	CORPORATE COMMUNICATIONS AND BRANDING (8)	19
COM01	Assess and revise internal and external communications to communicate gender equality, diversity, and inclusion commitment and provide gender-equitable messaging, language, and photos	I
COM02	Showcase talented female employees with diverse social identities and their professional achievements	2
COM03	Create informal communication opportunities to discuss gender equality–related topics	I
COM04	Develop and implement a social and behavior change communications (SBCC) strategy and plans to support the change management process, build support, and counter resistance.	3
COM05	Build a successful employer brand that is attractive to female candidates and individuals with diverse social identities	3
COM06	Showcase company commitment to gender equality, diversity, and inclusion through membership in relevant networks, associations, and conferences	3
COM07	Showcase company commitment through adoption of international standards and participation in rankings or awards on gender equality, diversity, and inclusion	3
COM08	Develop or join communication campaigns and organize events to promote gender equality, diversity, and inclusion	3

ANNEX IV. PROFESSIONAL ORGANIZATIONS WITH MEMBER **RESOURCES**

The Engendering Industries Best Practices Framework was developed using open-source resources. The following organizations are member-based organizations, some with membership dues. These organizations also provide relevant and useful information regarding fostering gender equality through the employee life cycle for their membership. You can find out more information about these organizations on their websites:

- African Women in Science and Engineering: https://www.aawse.org/
- Association for Talent Development: https://www.td.org/
- Australian HR Institute: https://www.ahri.com.au/

About Engendering Industries

USAID's Engendering Industries program increases economic opportunities for women in traditionally male-dominated sectors. Expanding women's workforce participation in male-dominated industries leads to tangible economic outcomes for women, such as formal employment opportunities and higher income. Increased gender equality in the workforce also improves business performance, increases employee retention and satisfaction, reduces turnover, drives productivity, and enhances an organization's resilience to crises and economic shocks. Engendering Industries uses a unique approach to improve gender equality in male-dominated sectors. Using customized tools and best practices, demand-driven coaching, the Gender Equity Executive Leadership Program, the Workforce Gender Equality Accelerated Program, and male-engagement workshops, Engendering Industries, builds staff capacity to implement gender equality interventions at their organizations.
